NATIONAL PLANNING TOOL FOR THE IMPLEMENTATION OF THE RAMSAR CONVENTION ON WETLANDS

(And the approved format for National Reports to be submitted for the 9th Meeting of the Conference of the Contracting Parties, Uganda, 2005)
TABLE OF CONTENTS (see footnote 1)

INSTITUTIONAL INFORMATION ........................................................................................................ 4
SUMMARY OF IMPLEMENTATION (OPTIONAL) .................................................................................. 4
OPERATIONAL OBJECTIVE 1. INVENTORY AND ASSESSMENT ............................................................ 6
OPERATIONAL OBJECTIVE 1.1: Describe the extent of wetland resources, especially at global and national (or, where appropriate, provincial) scales, in order to inform and underpin implementation of the convention and in particular the application of the wise use principle ................................................................. 6
OPERATIONAL OBJECTIVE 1.2: Assess and monitor the condition of wetland resources, both globally and nationally (or, where appropriate, provincially), in order to inform and underpin implementation of the Convention and in particular the application of the wise use principle .............................................................................................................................. 8
OPERATIONAL OBJECTIVE 2. POLICIES AND LEGISLATION, INCLUDING IMPACT ASSESSMENT AND VALUATION ........................................................................................................... 12
OPERATIONAL OBJECTIVE 2.1. Specify the most appropriate policy instrument(s) to be used in each country to ensure the wise use of wetlands ................................................................................................................................. 12
OPERATIONAL OBJECTIVE 2.2. Develop, review, amend when necessary, and implement national or supra-national policies, legislation, institutions and practices, including impact assessment and valuation, in all Contracting Parties, to ensure that the Convention, and especially the wise use principle, is being fully applied .................................................................................................................................................. 14
OPERATIONAL OBJECTIVE 3. INTEGRATION OF WETLAND WISE USE INTO SUSTAINABLE DEVELOPMENT ................................................................................................................................. 19
OPERATIONAL OBJECTIVE 3.1. Develop and disseminate methodologies to achieve the conservation and wise use of wetlands ................................................................................................................................. 19
OPERATIONAL OBJECTIVE 3.2. Ensure the conservation and wise use of peatlands as a demonstration of the ecosystem-based approach under the Convention ........................................................................................................................................... 21
OPERATIONAL OBJECTIVE 3.3. Increase recognition of the significance of wetlands for reasons of water supply, coastal protection, flood defense, food security, poverty alleviation, cultural heritage, and scientific research ................................................................................................................................................................... 22
OPERATIONAL OBJECTIVE 3.4. Integrate policies on the conservation and wise use of wetlands in the planning activities in all Contracting Parties, and in decision-making processes at national, regional, provincial and local levels, particularly concerning territorial management, groundwater management, catchment/river basin management, coastal and marine zone planning, and responses to climate change ................................................................................................................................................. 25
OPERATIONAL OBJECTIVE 4. RESTORATION AND REHABILITATION .......................................................... 32
OPERATIONAL OBJECTIVE 4.1. Identify priority wetlands where restoration or rehabilitation would be beneficial and yield long-term environmental, social or economic benefits, and implement the necessary measures to recover these sites ........................................................................................................................................................................ 32
OPERATIONAL OBJECTIVE 5. INVASIVE ALIEN SPECIES ........................................................................ 36
OPERATIONAL OBJECTIVE 5.1. Develop guidance and promote protocols and actions to prevent, control or eradicate invasive alien species in wetland systems .................................................................................................................................................. 36
OPERATIONAL OBJECTIVE 6. LOCAL COMMUNITIES, INDIGENOUS PEOPLE AND CULTURAL VALUES ....................................................................................................................................................................... 38
OPERATIONAL OBJECTIVE 6.1. Encourage active and informed participation of local communities and indigenous people, in particular women and youth, in the conservation and wise use of wetlands ........................................................................................................................................................................ 38
OPERATIONAL OBJECTIVE 7. PRIVATE SECTOR INVOLVEMENT ................................................................ 42
OPERATIONAL OBJECTIVE 7.1. Promote the involvement of the private sector in the conservation and wise use of wetlands ........................................................................................................................................................................ 42
OPERATIONAL OBJECTIVE 8. INCENTIVES ............................................................................................. 43
OPERATIONAL OBJECTIVE 8.1. Promote incentive measures that encourage the application of the wise use principle, and the removal of perverse incentives ........................................................................................................................................................................ 43
OPERATIONAL OBJECTIVE 9. COMMUNICATION, EDUCATION AND PUBLIC AWARENESS (CEPA) ................................................................................................................................. 45
OPERATIONAL OBJECTIVE 9.1. Integrate CEPA processes into all levels of policy development, planning and implementation of the Convention ........................................................................................................................................................................ 45
OPERATIONAL OBJECTIVE 9.2. Demonstrate that CEPA processes are effective in achieving Ramsar’s wetland wise use objectives at the global, national and local levels ........................................................................................................................................................................ 46
OPERATIONAL OBJECTIVE 9.3. Provide national leadership, networks and cohesive frameworks to support and catalyze CEPA for the wise use of wetlands ........................................................................................................................................................................................................ 47
OPERATIONAL OBJECTIVE 9.4. Transfer, exchange and share CEPA information and expertise that promotes and results in the wise use of wetlands ........................................................................................................................................................................................................ 47
OPERATIONAL OBJECTIVE 9.5. Improve the individual and collective capacity and opportunities of people to participate in and contribute to using wetlands wisely, through the recognition of the values of wetland resources ........................................................................................................................................................................ 49

1 Important: before printing the document, the Menu option TOOLS/OPTIONS/PRINT/UPDATE FIELDS has to be activated in order to update page numbers in the Table of Contents.
OPERATIONAL OBJECTIVE R9.V.1. Foster sustained national campaigns, programmes and projects to raise community awareness of the important ecosystem services provided by wetlands as well as their social, economic and cultural values.

OPERATIONAL OBJECTIVE R9.VII. Support and develop mechanisms to ensure that CEPA processes are incorporated into participatory, multi-stakeholder wetland management.

OPERATIONAL OBJECTIVE R9.VIII. Promote and support the role of wetland and other education centres as focal points for global, national and local CEPA efforts.

OPERATIONAL OBJECTIVE 10. DESIGNATION OF RAMSAR SITES.

OPERATIONAL OBJECTIVE 10.2. Maintain the Ramsar Sites Database and constantly update it with the best available information, and use the database as a tool for guiding the further designation of wetlands for the List of Wetlands of International Importance.

OPERATIONAL OBJECTIVE 11. MANAGEMENT PLANNING AND MONITORING OF RAMSAR SITES.

OPERATIONAL OBJECTIVE 11.1. Maintain the ecological character of all Ramsar sites.

OPERATIONAL OBJECTIVE 11.2. Monitor the condition of Ramsar sites, notify the Ramsar Bureau without delay of changes affecting Ramsar sites as required by Article 3.2, and apply the Montreux Record and Ramsar Advisory Mission as tools to address problems.

OPERATIONAL OBJECTIVE 12. MANAGEMENT OF SHARED WATER RESOURCES, WETLANDS AND WETLAND SPECIES.

OPERATIONAL OBJECTIVE 12.1. Promote inventory and integrated management of shared wetlands and hydrological basins.

OPERATIONAL OBJECTIVE 12.2. Promote cooperative monitoring and management of shared wetland-dependent species.

OPERATIONAL OBJECTIVE 12.3. Support existing regional arrangements under the Convention and promote additional arrangements.

OPERATIONAL OBJECTIVE 13. COLLABORATION WITH OTHER INSTITUTIONS.

OPERATIONAL OBJECTIVE 13.1. Work as partners with international and regional multilateral environmental agreements (MEAs) and other agencies.

OPERATIONAL OBJECTIVE 14. SHARING OF EXPERTISE AND INFORMATION.

OPERATIONAL OBJECTIVE 14.1. Promote the sharing of expertise and information.

OPERATIONAL OBJECTIVE 15. FINANCING THE CONSERVATION AND WISE USE OF WETLANDS.

OPERATIONAL OBJECTIVE 15.1. Promote international assistance to support the conservation and wise use of wetlands.

OPERATIONAL OBJECTIVE 15.2. Ensure that environmental safeguards and assessments are an integral component of all development projects that affect wetlands, including foreign and domestic investments.

OPERATIONAL OBJECTIVE 16. FINANCING OF THE CONVENTION.

OPERATIONAL OBJECTIVE 16.1. Provide the financial resources required for the Convention’s governance mechanisms and programmes to achieve the expectations of the Conference of the Contracting Parties.

OPERATIONAL OBJECTIVE 17. INSTITUTIONAL MECHANISMS OF THE CONVENTION.

OPERATIONAL OBJECTIVE 17.1. Ensure that the Conference of the Contracting Parties, Standing Committee, Scientific and Technical Review Panel, and Ramsar Bureau are operating at a high level of efficiency and effectiveness to support implementation of this Strategic Plan.

OPERATIONAL OBJECTIVE 18. INSTITUTIONAL CAPACITY OF CONTRACTING PARTIES.

OPERATIONAL OBJECTIVE 18.1. Develop the capacity within, and promote cooperation among, institutions in Contracting Parties to achieve conservation and wise use of wetlands.

OPERATIONAL OBJECTIVE 20. TRAINING.

OPERATIONAL OBJECTIVE 20.1. Identify the training needs of institutions and individuals concerned with the conservation and wise use of wetlands, particularly in developing countries and countries in transition, and implement appropriate response.

OPERATIONAL OBJECTIVE 21. MEMBERSHIP OF THE CONVENTION.

FEEDBACK ON COP9 NATIONAL REPORT FORMAT.
INSTITUTIONAL INFORMATION

CONTRACTING PARTY

ISRAEL

DESIGNATED RAMSAR ADMINISTRATIVE AUTHORITY

Name of agency: Ministry of the Environment
Head name and title: Dr. Miriam Haran, Director General
Mailing address: P.O.B. 34033, Jerusalem, 95464, Israel
Telephone/Fax: Tel: 972-2-6553720 /Fax: 972-2-6535939
Email: miriamh@environment.gov.il

DESIGNATED NATIONAL FOCAL POINT (OR DAILY CONTACT IN THE ADMINISTRATIVE AUTHORITY) FOR RAMSAR CONVENTION MATTERS

Name and title: Dr. Eliezer Frankenberg, Deputy Chief Scientist
Mailing address: Israel Nature and Parks Authority, 3 Am VeOlamo St., Jerusalem 95463, Israel
Telephone/Fax: Tel: 972-2-5005400 /Fax: 972-2-6529232
Email: eliezer.frankenberg@nature-parks.org.il

DESIGNATED NATIONAL FOCAL POINT FOR MATTERS RELATING TO STRP (SCIENTIFIC AND TECHNICAL REVIEW PANEL)

Name and title: Dr. Reuven Ortal, Director, Aquatic Ecology
Mailing address: Israel Nature and Parks Authority, 3 Am VeOlamo St., Jerusalem 95463, Israel
Telephone/Fax: Tel: 972-2-5005400 /Fax: 972-2-6529232
Email: reuven.ortal@nature-parks.org.il

DESIGNATED NATIONAL GOVERNMENT FOCAL POINT FOR MATTERS RELATING TO THE CEPA PROGRAMME ON COMMUNICATION, EDUCATION AND PUBLIC AWARENESS

Name and title: Ms. Tammy Keren-Rotem, Director, Environmental Education Programs
Mailing address: Israel Nature and Parks Authority, 3 Am VeOlamo St., Jerusalem 95463, Israel
Telephone/Fax: Tel: 972-2-5005400 /Fax: 972-2-6529232
Email: tammy.keren@nature-parks.org.il

DESIGNATED NATIONAL NON-GOVERNMENT FOCAL POINT FOR MATTERS RELATING TO THE CEPA PROGRAMME ON COMMUNICATION, EDUCATION AND PUBLIC AWARENESS

Name and title: Mr. Raanan Boral, Director, Environmental Protection Division
Mailing address: Society for the Protection of Nature in Israel, 4 Hashfela St., Tel Aviv 66183, Israel
Telephone/Fax: Tel: 972-3-6388744 /Fax: 972-3-5374302
Email: raanan@spni.org.il

SUMMARY OF IMPLEMENTATION (OPTIONAL)

Please, include a summary on the implementation of Ramsar Convention in your country during the last triennium

Israel is inherently poor in water bodies. In order to supply the demands of its agricultural, domestic and industrial sectors, it has exploited almost all of its water resources - springs, groundwater reservoirs and the Jordan River system. Out of some 500 declared or proposed national parks and nature reserves, about 160 include wetlands, and the majority of these are threatened by inadequate water supplies, in terms of both quality and quantity. Only 850 hectares out of the 28,000 hectares of wetlands which once existed in Israel remain today – a mere 3%.

Israel entered the 21st century with one of its greatest water overdrafts ever – a crisis that impacted not only the agricultural and domestic sectors but habitats and ecosystems as well. The drought, which occurred between 1999-2002, underlined the necessity for wetland restoration. This awareness has led to a number of initiatives in recent years:
In 2000, at the height of the water crisis, the government took a decision to allocate 50 million cubic meters of water to nature, to promote seawater and brackish water desalination projects, to advance wastewater treatment facilities, to import water and to promote water conservation and savings.

In 2003, a national policy proposal was drafted and published by the Nature and Parks Authority in conjunction with the Ministry of the Environment on *The Right of Nature to Water – Water Demands for Water Bodies and Wetlands*. The publication surveys the water demands of Israel’s wetlands and assesses the quantity of water required to preserve these sites including nature reserves.

A restoration program for the country’s wetlands was initiated and is currently being implemented. This program includes the country’s two Ramsar sites: the Hula Nature Reserve and the En Afeq Nature Reserve. The restoration programs are designated to assure water allocations to the reserves also during drought periods, in the quantity and quality required, in order to preserve habitat and species diversity.

The Ministry of the Environment has placed river restoration high on its list of priorities. To date, 14 local administrations for river restoration have been set up and tens of millions of dollars have been invested in restoring the country’s ailing rivers. In parallel, new and upgraded wastewater treatment plants have helped stop the discharge of sewage into rivers and stringent enforcement against polluters has been carried out.

In January 2003, due to the accelerated decline of the Dead Sea water level, the government called for the preparation of an in-depth study on the Dead Sea as a first step toward a policy on the future of this water body. The first part of this document, entitled “Setting the Policy Agenda for the Future of the Dead Sea: Interim Report Examining the ‘Business as Usual’ Scenario” was published in March 2004.

In December 2003, Israel and Jordan signed a Memorandum of Understanding on a monitoring and data management program in the Gulf of Aqaba. The agreement recognizes the importance of transboundary coordination and cooperation between the national monitoring programs of both countries to promote the long term sustainable use and conservation of their shared marine resources.

In 2004, an amendment to paragraph 6 of the Water Law which adds another purpose to the five already enumerated came into force, namely: allocation of water for nature and landscapes assets, i.e., for the conservation and rehabilitation of natural assets and landscapes including rivers, springs and wetlands.

In 2004, the Ministry of the Environment and the National River Administration published a Hebrew document ("Streams of Israel- Policy and Planning Principles") on policy and planning principles for the restoration of Israel’s rivers. The purpose of the document is to formulate planning principles and a comprehensive national policy on river restoration, regulation and management. *Inter alia*, the document recommends that efforts should be focused on developing an awareness of rivers as legitimate consumers of water.

Conservation and wise use of the Sea of Galilee (Lake Kinneret) continued with cooperative and integrated efforts by such bodies as the Kinneret Authority and The Yigal Allon Kinneret Limnological Laboratory. The Laboratory, which conducts limnological research and monitors environmental factors which may affect the state of the lake, has upgraded its monitoring capabilities with the help of an ecoraft (acronym for “ecological monitoring raft”) for the continuous monitoring of water quality using automated instrumentation and space for on-lake monitoring and research activities.

Between March 20-27, 2004, Israel celebrated a “Week of Love for Nature, Water and the Environment” which was dedicated to raising awareness of water issues, especially as they relate to wetlands, and of nature protection for the conservation of biodiversity, the provision of ecosystem services, and the well-being of people everywhere. Another week is planned for April 2005.

In 2004, the Law for the Protection of the Coastal Environment Law came into force in Israel. The law aims at protecting, preserving and restoring the Mediterranean coastal environment and its natural assets, preventing damage to the coastal environment and preserving the coast and its sand resources for the benefit and enjoyment of present and future generations.

A National Master Plan on Rivers and Drainage was initiated in 2004. It aims at assuring the functions of rivers as drainage channels for flood control while, at the same time, assuring the continued existence and functioning of rivers and their environs for both rehabilitation, restoration and development of landscape values, ecology and culture and for leisure and recreation purposes.

In 2003/4, work on the preparation of Israel’s National Biodiversity Strategic Action Plan continued,
which places emphasis, inter alia, on the conservation and wise use of the country’s wetlands and on wetland species. The national plan is expected to be completed by the end of 2005.

- A “transitional Master Plan for Water Sector Development in the years 2002-2010” has been prepared by the Water Commission. It relates to policy, institutional and operational changes required to improve Israel’s water balance and its water quality. Among its major principles: legitimizing environmental needs through water allocations to sustain wetlands and rivers for nature conservation and recreational purposes and rehabilitating natural water sources and maintaining their quality to enable them to serve both as the sources and the main regulating reservoirs for the water.

**OPERATIONAL OBJECTIVE 1. INVENTORY AND ASSESSMENT**

**OPERATIONAL OBJECTIVE 1.1: Describe the extent of wetland resources, especially at global and national (or, where appropriate, provincial) scales, in order to inform and underpin implementation of the convention and in particular the application of the wise use principle**

Go to next operational objective - Go to Table of Contents

**PLANNING TOOL SECTION**

| PRIORITY: | B |
| RESOURCING: | C |
| TARGETS (text answer): | To continue developing Israel's wetland inventory in the coming years. |
| PLANNED ACTIVITIES (text answer): | To collect information on those wetlands which have not yet been described, including artificial reservoirs, and to collect and update information on existing wetlands according to a uniform format within five years. |

**COP9 REPORT SECTION**

Action 1.1.1.- Promote and encourage the use of standard wetland inventory methodologies following the Ramsar Framework for Wetland Inventory (Resolution VIII.6), to undertake, update and disseminate national (or, where appropriate, provincial) scientific inventories of wetlands.

GLOBAL TARGET 2003-2005: By COP9, all Parties without completed inventories to have initiated action in line with the Ramsar Framework for Wetland Inventory, and as far as possible to have completed and disseminated comprehensive national wetland inventories.

1.- Country has a comprehensive National Wetland Inventory *(if inventory exists, please include the number of sites)*

| E | Choose an answer for each indicator |
| Choose an answer for each indicator |
| A = Not applicable; |
| B = Yes; |
| C = No; |
| D = Partially in some cases; |
| E = In progress; |
| F = Being planned; |
| G = Being updated; |
| H = Other status (explain below); |
| I = No answer |

| Nº wetlands / Ramsar sites |

2.- Methodologies recommended in the Ramsar Framework for Wetland Inventory (Resolution VIII.6) were used for National Wetland Inventory

3.- Implementation progress since COP8 *(Please include information on the application of inventory methodologies, the status of the inventory - end date or expected timeframe, contents of the inventory - and other additional comments you consider relevant.)*

A series of drought years between 1999-2002 led to the formulation of a major rehabilitation program for the country’s wetlands. This included the preparation of a document on “The Right of Nature to Water” in 2003 (for a special parliamentary investigation committee) which presents the water requirement of wetlands in Israel. To assure the success of the program, site-specific inventories are currently being drawn for wetlands within nature reserves. The inventories include geographical, hydrological and ecological data.

Action 1.1.2.- Include in national wetland inventories information which identifies: a) potential Ramsar sites; b) wetlands of national, provincial or local importance in the territory of each Contracting Party; and c) wetlands...
that need restoration and rehabilitation, with a list of priorities, giving particular priority to inventories of karst and caves, intertidal wetlands, coral reefs, peatlands, sites supporting globally threatened species, and other wetland types and features under-represented in the Ramsar List.

GLOBAL TARGET 2003-2005: All national wetland inventories initiated after COP8 to include information on wetland importance; potential Ramsar sites; wetlands for restoration; location of under-represented wetland types; and values and functions, in particular in relation to poverty eradication strategies.

**See actions 3.2.1, 3.3.1, r4.i.1, and Operational Objective 10.1
Note: if available, please indicate the number of sites under each category:**

12. Implementation progress since COP8

In view of the drought years which occurred in Israel between 1999-2002, special attention was placed on the assessment and documentation of wetlands that need restoration as well as allocations of water.

**Action 1.1.3.-** Ensure that national arrangements for the custodianship, storage and maintenance of wetland inventory data and information, including metadata, are in place and introduce the necessary measures to ensure that this resource is both as comprehensive as possible and readily accessible to the full range of stakeholders.

GLOBAL TARGET 2003-2005: All wetland inventories to have full data management, custodianship, and metadata records in place.

<table>

The Nature and Parks Authority is collecting and maintaining information on wetlands in national parks and...
nature reserves and the Ministry of the Environment is collecting and maintaining information on rivers.

Action 1.1.4.- Make available a web-based wetland inventory meta-database and encourage the inclusion of a metadata record for all national (including provincial) wetland inventories.

GLOBAL TARGET 2003-2005: By COP9, a Web-based metadatabase in place and populated with information on all national wetland inventories.

- F= Being planned; G = Being updated;
- H = Other status (explain below); I = No answer

Action 1.1.6.- Encourage the use of relevant information from wetland inventories by decision-makers, wetland managers and wetland users in the development and implementation of national wetland policies and national and local wetland programmes.

GLOBAL TARGET 2003-2005: By COP9, all Parties with wetland inventories to have made these available to all stakeholders.

Information on the scarcity of water and deterioration of wetlands in Israel was distributed to decision makers, wetland managers and the public. This resulted in the preparation of a policy document on the “Right of Nature to Water” in 2003 and an amendment to the Water Law which recognizes the right of nature, including wetlands, to water in 2004. The dissemination of information on wetlands led to a legislative change, the formulation of a policy and the implementation of rehabilitation.

Choose an answer:
- A = Not applicable; B = Yes; C = No;
- D = Partly/in some cases; E = In progress;
- F= Being planned; G = Being updated;
- H = Other status (explain below); I = No answer

Action 1.1.7.- Give high priority to developing projects for inventory activities for the Small Grants Fund.

<table>

OPERATIONAL OBJECTIVE 1. INVENTORY AND ASSESSMENT

OPERATIONAL OBJECTIVE 1.2: Assess and monitor the condition of wetland resources, both globally and nationally (or, where appropriate, provincially), in order to inform and underpin implementation of the Convention and in particular the application of the wise use principle.
### PLANNING TOOL SECTION

### COP9 REPORT SECTION

**Action 1.2.1.-** Actively contribute to the work of the Millennium Ecosystem Assessment (MA) project (http://www.millenniumassessment.org) by serving on its Board and Executive Committee and on its various working groups; analyze the MA’s methodologies, results and findings at Ramsar COP9, and review the necessary actions, if any, to update and make comprehensive the global assessment of wetland resources and their condition. (Refer also to Action 1.1.5)

<table>
<thead>

</tr>
</tbody>
</table>

2.- Implementation progress since COP8 [Please include additional comments on the contribution made to the work of the MA.]

**Action r1.2.i.-** Make available to Contracting Parties and other interested organizations the findings and guidance developed by the Millennium Ecosystem Assessment (MA) for their use, as appropriate, of the MA guidance and methods for sub-global ecosystem assessments in the assessment of wetland ecosystems at the local, national and regional (supra-national) scale, including through international cooperation on the assessment of transboundary aquatic ecosystems. (Resolution VIII.7).

| 1. MA guidance and methods used for ecosystem assessment at national scale | **C** |
| Choose an answer for each indicator  |
| A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer |

| 2. MA guidance and methods used for ecosystem assessment at regional (supranational) scale | **C** |
| Choose an answer for each indicator  |
| A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer |

| 3. MA guidance and methods used for ecosystem assessment at local scale | **C** |
| Choose an answer for each indicator  |
| A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer |

4.- Implementation progress since COP8 [Please include additional comments on the use of MA guidance and methods.]

**Action 1.2.2.-** Establish a repository for the contribution by Contracting Parties of summarized national (or, where appropriate, provincial) assessments of changes in the status of wetland resources, as the basis for regular analysis and improved reporting on the status of wetland resources.

| 1. Repository of assessments of changes in wetland status established | **C** |
| Choose an answer for each indicator  |
| A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer |

2.- Implementation progress since COP8 [Please include additional comments on the repository of assessment of changes in wetland status, its contents and uses.]
### Action 1.2.5.- Undertake assessments of the vulnerability of wetlands to change in ecological character, including their vulnerability to the impacts of climate change and sea-level rise.

**GLOBAL TARGET 2003-2005: SC/Bureau to identify at least 20 Parties willing to undertake vulnerability assessments and report to COP9.**

| 1. Assessments of the vulnerability of wetlands to change in ecological character were undertaken | B | Choose an answer for each indicator  
\[A = \text{Not applicable}; B = \text{Yes}; C = \text{No};

D = \text{Partly in some cases}; E = \text{In progress};

F = \text{Being planned}; G = \text{Being updated}; H = \text{Other status (explain below)}; I = \text{No answer}  

| 2. The assessments include impacts of climate change | D |  

| 3. The assessments include impacts of sea-level rise | C |  

| 4.- Implementation progress since COP8  
P[Please include additional comments on the assessments undertaken.] |  

The assessments that were made during the drought years (1999-2002) related to the vulnerability of wetlands to change in ecological character and to the impacts of climate change which include potential for reduced rainfall. Israel's National Report on Climate Change (2000) includes some information on the vulnerability of wetlands to climate change and sea-level rise.

---

### Action r1.2.iv.- Continue to document the past losses and current status and trends of coastal wetlands, including in national wetland inventories, and report on their conservation status in National Reports to COP9. (Resolution VIII.4)

| 1. Past losses and current status and trends of coastal wetlands documented | D | Choose an answer  
\[A = \text{Not applicable}; B = \text{Yes}; C = \text{No};

D = \text{Partly in some cases}; E = \text{In progress};

F = \text{Being planned}; G = \text{Being updated}; H = \text{Other status (explain below)}; I = \text{No answer}  

| 2.- Implementation progress since COP8  
P[Please include additional comments on the conservation status and trends of coastal wetlands.] |  

Most of Israel's wetlands have been drained but special importance has been given to documenting the current status of coastal rivers and the coastline in general.

| 3.- Summary on the conservation status of coastal wetlands  
P[Please provide here a summary on the conservation status of coastal wetlands and provide reference citation to any relevant publication, reports or analysis.] |  

Within the framework of a river restoration project, major priority has been given to coastal rivers and millions of dollars have been invested in restoring these rivers through cleanups, pollution abatement and development of parks.

A Protection of the Coastal Environment Law was enacted in 2004. Under the law sea and shore are considered one integral unit which extends 300 meters inland from the Mediterranean shoreline and seaward to the extent of the territorial waters. The law calls for reducing damage to the coastal environment, including, inter alia, damage to ecosystems, flora and fauna or stream mouths.

---

### Action r1.2.v.- Update information on mangrove forest cover and conservation status and levels of use of mangroves, and provide this information to the Bureau and STRP. (Resolution VIII.32)

| 1. Information on mangrove forest cover has been compiled | A | Choose an answer for each indicator  
\[A = \text{Not applicable}; B = \text{Yes}; C = \text{No};

D = \text{Partly in some cases}; E = \text{In progress}; F = \text{Being planned}; G = \text{Being updated}; H = \text{Other status (explain below)}; I = \text{No answer}  

| 2. Information on conservation status of mangroves has been compiled | A |  

| 3. Information on levels of use of mangroves has been compiled | A |  

| 4.- Implementation progress since COP8  
P[Please include additional comments on the information compiled related to mangroves.] |  

---

### Action r1.2.vi.- Report on the impacts of dams on wetlands in the territory of each Contracting Party, in National Reports to COP9. (Resolution VIII.2).
1.- The impacts of dams on wetlands have been assessed *(if available, please include number of sites affected)*

<table>
<thead>
<tr>
<th>D</th>
<th>Choose an answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Nº wetlands / Ramsar sites</th>
</tr>
</thead>
</table>

2.- Implementation progress since COP8 *(Please include information on the impacts of dams on wetlands, sites affected, and other additional comments you consider relevant.)*

Israel does not have any large dams.

3.- Impacts of dams on wetlands *(Please provide here a summary of impacts and provide reference citation to any relevant publications, reports or analyses.)*

### Action 1.2.vii.
- Monitor and assess the impacts of drought and other natural disasters on the ecological character of Ramsar sites and other wetlands, and on the livelihoods of local communities and indigenous peoples dependent on these wetlands, and report this information to the Ramsar Bureau and STRP. (Resolution VIII.35).

<table>

</tbody>
</table>

### Action 1.2.6.
- Assess the contribution of Ramsar sites and other wetlands to the maintenance of fisheries, including utilizing information available from the *Millennium Ecosystem Assessment (MA)* and other assessment programmes, and recommend sustainable management practices which can contribute to the WSSD target of, where possible by 2015, maintaining or restoring depleted fish stocks to levels that can produce the maximum sustainable yield.

<table>

<td>Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

1. The contribution of Ramsar sites and other wetlands to the maintenance of fisheries has been assessed

2.- Implementation progress since COP8 *(Please include additional comments on the assessment undertaken.)*

Fishing is prohibited in wetlands included in nature reserves and national parks.

<table>
<thead>
<tr>
<th>A</th>
<th>Choose an answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

3. Recommendations on sustainable management practices of fish stocks in wetlands have been transmitted to relevant authorities/stakeholders

4.- Implementation progress since COP8 *(Please include additional comments on the recommendations and their transmission to relevant authorities/stakeholders.)*
Action 1.2.7.- Undertake assessments of water quality and quantity available to, and required by, wetlands, to support the implementation of the Guidelines for the allocation and management of water for maintaining the ecological functions of wetlands (Resolution VIII.1), as a contribution to the WSSD Plan of Implementation.

GLOBAL TARGET 2003-2005: At least 50 CPs to have undertaken water quality and quantity assessments.

1. The water quality and quantity available to, and required by, wetlands has been assessed  
   E  Choose an answer  
   A = Not applicable; B = Yes; C = No; D = Partly/in some cases;  
   E = In progress; F = Being planned; G = Being updated;  
   H = Other status (explain below); I = No answer  

2.- Implementation progress since COP8 [Please include additional comments on the assessment undertaken.]

The preliminary policy document on “The Right of Nature to Water” includes a preliminary database on the quantities of water required to preserve, rehabilitate, restore and develop the country’s wetlands. At present, databases for each individual wetland are being prepared so as to provide an estimate of water quality available to, and required, by wetlands.

OPERATIONAL OBJECTIVE 2. POLICIES AND LEGISLATION, INCLUDING IMPACT ASSESSMENT AND VALUATION

OPERATIONAL OBJECTIVE 2.1. Specify the most appropriate policy instrument(s) to be used in each country to ensure the wise use of wetlands

PLANNING TOOL SECTION

PRIORITY:  
A  A= High; B= Medium; C= Low; D= Not relevant; E= No answer  

RESOURCING:  
C  A= Good; B= Adequate; C= Limiting; D= Severely limiting; E= No answer  

TARGETS (text answer):  
To formulate policies and legislation on the wise use of wetlands  

PLANNED ACTIVITIES (text answer):  
To prepare national plans and programs on the sustainable development and use of the country's water resources.

COP9 REPORT SECTION

Action 2.1.1.- If not yet done, develop and implement a National Wetland Policy using the guidelines adopted by COP7 for this purpose (Ramsar Wise Use Handbook 2), and ensure that policy goals are explicit, comprehensive and accessible.

GLOBAL TARGET 2003-2005: National Wetland Policy or equivalent instrument initiated by all Parties not having it, incorporating WSSD targets and actions, as appropriate.

1. A National Wetland Policy (or equivalent instrument) is in place  
   B  Choose an answer for each indicator  
   A = Not applicable; B = Yes;  
   C = No; D = Partly/in some cases; E = In progress; F = Being planned;  
   G = Being updated; H = Other status (explain below); I = No answer  

2. The National Wetland Policy (or equivalent instrument) goals are explicit, comprehensive and accessible  
   B  

3. The National Wetland Policy (or equivalent instrument) incorporates WSSD targets and actions  
   B  

4.- Implementation progress since COP8 [Please include additional comments on the status of the National Wetland Policy or equivalent instrument, its contents, and any other information you consider relevant.]

While Israel does not have a single National Wetland Policy per se, it does have several instruments in which such a policy is integrated. The Water Law of 1959 states that “the water resources in the State are public property; they are subject to the control of the State and are destined for the requirements of its inhabitans.
and for the development of the country.” The law defines “water resources” very broadly to include both above-ground and underground waters, both natural and artificial, and including drainage water and sewage water. In 2004, the Water Law was amended to include the right of nature, including wetlands, to water, in addition to the right of water for domestic purposes, agriculture, industry, handicraft, commerce and services and public services.

In 2004, the Ministry of the Environment published a document entitled “Streams of Israel- Policy and Planning Principles.” The purpose of the document is to formulate planning principles and a comprehensive national policy on river restoration, regulation and management.

In addition, a policy document on “The Right of Nature to Water” was published by the Nature and Parks Authority, in cooperation with the Ministry of the Environment in 2003. The policy document calls for a change in water management and development to achieve two goals: maximum preservation of those nature and landscape values that have remained and rehabilitation and restoration of nature and landscape assets which have dwindled or disappeared. The document makes recommendations on water allocations to the country’s wetlands, relates to the right of rivers to floodwater in order to facilitate the environmental and ecological services of the stream, to principles of effluent reuse for river restoration, and to policies on minimum water levels (so called “red lines”) in aquifers and the Sea of Galilee (Lake Kinneret).

Israel's Integrated National Master Plan for Building, Development and Conservation (NOS 35) was approved by the National Board for Planning and Building Board in 2005. The plan proposes open spaces along water courses and calls for preserving the urban shoresline as public open space. In these areas, development will be severely restricted except for leisure and recreation purposes.

A National Master Plan on Rivers and Drainage was initiated in 2004. It aims at assuring the functions of rivers as drainage channels for flood control while, at the same time, assuring the continued existence and functioning of rivers and their environs for both rehabilitation, restoration and development of landscape values, ecology and culture and for leisure and recreation purposes.

Furthermore, Israel is in the midst of preparing a National Biodiversity Strategic Action Plan in which the conservation and development of wetlands is a major element.

The Water Commission has prepared a “Transitional Master Plan for Water Sector Development” for the years 2002-2010, which will be updated to 2020 later this year. The master plan calls for policy, institutional and operational changes to improve Israel’s water balance and consequently its water quality for both human and nature purposes.

**Action 2.1.2.-** Ensure that wetland policies are fully integrated into and harmonized with other strategic or planning processes and documents, in particular those related to biodiversity, desertification, climate change, agriculture, trade in endangered species, water resource management, integrated coastal zone management and environmental planning in general including national strategies for sustainable development called for by the WSSD. When these other documents include chapters or sections on different ecosystems, ensure that one of them is devoted to wetlands.

**GLOBAL TARGET 2003-2005: National Wetland Policy or equivalent instrument fully integrated into other strategic and planning processes by all Parties, including poverty eradication strategies and water resources management and water efficiency plans and national strategies for sustainable development in line with WSSD targets.**

<table>
<thead>
<tr>
<th>1. Wetland issues have been incorporated into national strategies for sustainable development called for by WSSD</th>
<th>B</th>
<th><strong>Choose an answer for each indicator</strong></th>

</thead>
<tbody>
<tr>
<td>2. Wetland issues have been incorporated into poverty eradication strategies</td>
<td>A</td>
<td></td>
</tr>
<tr>
<td>3. Wetland issues have been incorporated into water resources management and water efficiency plans</td>
<td>B</td>
<td></td>
</tr>
<tr>
<td>4. Wetland issues (conservation, wise use, restoration/rehabilitation) have been integrated into other sectoral strategic or planning processes and documents at any of the following levels: national, regional, provincial, and local</td>
<td>B</td>
<td><strong>Choose an answer for each indicator</strong></td>
</tr>
<tr>
<td></td>
<td>A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
<td></td>
</tr>
</tbody>
</table>
5.- Implementation progress since COP8 [Please include additional comments on the incorporation of wetland issues into other sectoral strategic or planning processes.]

Israel is currently preparing ministerial sustainable development strategies in which wetland issues will be incorporated as well. Wetland issues are fully incorporated into water resources management and water efficiency plans due to Israel’s scarcity of fresh water and the gap between supply and demand. For this purpose, a “Master Plan for Water Sector Development” has been published by the Water Commission.

Action r2.1.i.- When reviewing land tenure policies consider, where appropriate, wetland tenure systems and user rights in a manner that promotes fair, transparent and sustainable management of wetlands and their resources. (Resolution VIII.34).

<table>
<thead>
<tr>
<th>1. Wetland tenure systems and user rights have been considered in order to promote fair, transparent and sustainable management</th>
<th>A</th>
</tr>
</thead>
<tbody>
<tr>
<td>Choose an answer</td>
<td>A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

2.- Implementation progress since COP8 [Please include additional comments on the consideration of wetland tenure systems and user rights in order to promote fair, transparent and sustainable management.]

According to the Water Law, Israel's water resources belong to the State and are destined for the requirements of its inhabitants and for the development of the country.

Action r2.1.ii.- Give priority to reviewing legislation, policies and incentives directly or indirectly related to high Andean wetlands and prepare additional national strategies designed to ensure their wise use and conservation, duly integrated into National Wetland Policies, National Biodiversity Strategies, National Development Plans, and other similar instruments. (Resolution VIII.39)

<table>
<thead>
<tr>
<th>1. A review of legislation, policies and incentives directly or indirectly related to high Andean wetlands has been completed</th>
<th>A</th>

</tr>
</tbody>
</table>

| 2. Implementation progress since COP8 [Please include additional comments on the implementation of this action.] | C |

OPERATIONAL OBJECTIVE 2. POLICIES AND LEGISLATION, INCLUDING IMPACT ASSESSMENT AND VALUATION

OPERATIONAL OBJECTIVE 2.2. Develop, review, amend when necessary, and implement national or supra-national policies, legislation, institutions and practices, including impact
assessment and valuation, in all Contracting Parties, to ensure that the Convention, and especially the wise use principle, is being fully applied.

### PLANNING TOOL SECTION

| PRIORITY: | A |
| RESOURCING: | B |
| TARGETS (text answer): | To continue to develop, review and implement policies and legislation on the conservation and sustainable use of wetlands. |
| PLANNED ACTIVITIES (text answer): | To assess development plans that impact on wetlands and implement policy and legislation on the conservation and wise use of water resources. |

### COP9 REPORT SECTION

**Action 2.2.1.-** Apply the Guidelines for Reviewing laws and institutions to promote the conservation and wise use of wetlands (Ramsar Wise Use Handbook 3) to carry out a review of legislation and institutions and, as necessary, amend or modify legislation and institutional procedures to preclude unwise use of wetlands.

**GLOBAL TARGET 2003-2005:** SC/Bureau to identify at least 100 Parties to initiate and if possible complete by COP9 comprehensive reviews of their laws and institutions.

1. The Party is one of the 100 CPs identified by the Ramsar Bureau to initiate and if possible complete by COP9 a comprehensive review of wetland-related legislation and institutions

   - Choose an answer for each indicator
   - A = Not applicable;
   - B = Yes; C = No;
   - D = Partly/in some cases;
   - E = In progress; F= Being planned; G = Being updated;
   - H = Other status (explain below); I = No answer

2. A review of legislation and institutions to promote the wise use of wetlands has been completed

   - Intra- and/or inter-ministerial dialogues have been established

   - Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

   - A Ramsar Advisory Committee exists which is composed of representatives from the Nature and Parks...
Authority and the Ministries of Foreign Affairs, Agriculture and the Environment. The committee meets to discuss issues related to the conservation of wetlands.

### Action r2.2.ii.- Recognize cultural and heritage values relating to wetlands in existing heritage protection, legal frameworks and policies. (Resolution VIII.19)

**See action r3.3.iii**

1. **Cultural and heritage values related to wetlands have been incorporated into existing heritage protection, legal frameworks and policies**  
   - **B** Choose an answer  
     
     - A = Not applicable;  
     - B = Yes;  
     - C = No;  
     - D = Partly/in some cases;  
     - E = In progress;  
     - F= Being planned;  
     - G = Being updated;  
     - H = Other status (explain below);  
     - I = No answer  

2. **Implementation progress since COP8 [Please include additional comments on the implementation of this action.]**

The document on “Policy and Planning Principles of the Rivers of Israel” specifically relates to the cultural importance of the country’s rivers. Israel’s rivers are cited in the Bible and their names are associated with historic events. The policy document calls for these rivers to be integrated into the national tourism system and to be accentuated, documented and marked as essential elements in the heritage of the land. In addition, the cultural values of protected national parks which include wetlands are highlighted.

### Action r2.2.iii.- Give priority to assessing the conservation status of mountain wetlands, to reviewing the legislation, policies and practices that may be impacting negatively on these important ecosystems, and to taking the necessary actions for stopping and reversing such impacts. (Resolution VIII.12)

**See action r3.1.i**

1. The conservation status of mountain wetlands has been assessed  
   - **A** Choose an answer  
     
     - A = Not applicable;  
     - B = Yes;  
     - C = No;  
     - D = Partly/in some cases;  
     - E = In progress;  
     - F= Being planned;  
     - G = Being updated;  
     - H = Other status (explain below);  
     - I = No answer  

2. A review of legislation, policies and practices that may be impacting negatively on mountain wetlands has been completed  
   - **A** Choose an answer  

3. Actions have been taken for stopping and reversing impacts on mountain wetlands  
   - **A** Choose an answer  

4. **Implementation progress since COP8 [Please include additional comments on assessment, reviews and other actions taken in relation to mountain wetlands.]**

### Action r2.2.iv.- Make use, as appropriate, of the Guidelines for incorporating biodiversity-related issues into environmental impact assessment legislation and/or processes and in strategic environmental assessment, as adopted by Decision VI/7 of CBD COP6, with the assistance of the guidance prepared by the STRP and embedded in the text of the CBD Guidelines (Resolution VIII.9); and encourage full participation of local communities and indigenous peoples in impact assessments. (Resolution VIII.9)

1. The Guidelines for Environmental Impact Assessment annexed to Resolution VIII.9 are being applied  
   - **B** Choose an answer  
     
     - A = Not applicable;  
     - B = Yes;  
     - C = No;  
     - D = Partly/in some cases;  
     - E = In progress;  
     - F= Being planned;  
     - G = Being updated;  
     - H = Other status (explain below);  
     - I = No answer  

2. **Implementation progress since COP8 [Please include additional comments on the application of the Guidelines for Environmental Impact Assessment (annex to Resolution VIII.9).]**

Israel includes biodiversity and wetland considerations in its environmental impact assessments. Updated Environmental Impacted Assessment Regulations were promulgated in 2003, with special emphasis on coasts and riverbanks.

3. Local communities and indigenous peoples have been involved in impact assessment processes  
   - **C** Choose an answer  
     
     - A = Not applicable;  
     - B = Yes;  
     - C = No;  
     - D = Partly/in some cases;  
     - E = In progress;  
     - F= Being planned;  
     - G = Being updated;  
     - H = Other status (explain below);  
     - I = No answer
4.- Implementation progress since COP8 [Please include additional comments on the involvement of local communities and indigenous peoples in impact assessment processes.]

Action 2.2.2.- Apply Strategic Environmental Assessment practices when reviewing national and provincial policies, programmes, and plans that may impact upon wetlands.

GLOBAL TARGET 2003-2005: SC/Bureau to identify at least 50 Parties to have in place Strategic Environmental Assessment for policies, programmes and plans impacting on wetlands.

1. The Party has been identified by the Ramsar Bureau as one having in place Strategic Environmental Assessment in relation to wetlands

2. A review of policies, programmes, and plans that may impact upon wetlands has been completed

3.- Implementation progress since COP8 [Please include additional comments on the review of policies, programmes and plans that may impact upon wetlands.]

Within the framework of the preparation of a National Biodiversity Strategic Action Plan, some policies and plans that may impact upon wetlands are being reviewed.

4. Strategic Environmental Assessment practices have been applied while reviewing policies, programmes and plans that may impact upon wetlands

5.- Implementation progress since COP8 [Please include additional comments on the way Strategic Environmental Assessment practices have been applied while reviewing policies, programmes and plans that may impact upon wetlands.]

Action 2.2.3.- If not yet in place, develop and implement Environmental Impact Assessment (EIA) legislation so as to ensure that an EIA is carried out, as appropriate, in wetlands, including Ramsar sites, where adverse impacts may occur due to a proposed development, change in land/water use, invasive species, etc., in line with additional guidance adopted by Resolution VIII.9 and enlisting the collaboration, if required, of the International Association of Impact Assessment (IAIA). Ensure that these impact assessments include full and appropriate consideration of the environmental, social, economic and cultural impacts.

GLOBAL TARGET 2003-2005: All CPs to have required EIA, as appropriate, for proposed projects, developments or changes which may impact on wetlands.

1.- Legislation on Environmental Impact Assessment (EIA) applicable to wetlands is in place

2.- EIA is carried out for projects, developments or changes which may impact on wetlands (if available, please include number of sites)

3.- EIAVs have included full and appropriate consideration of the environmental, social, economic and cultural impacts

4.- Implementation progress since COP8 [Please include comments on Environmental Impact Assessment implementation at national level.]

New regulations on EIA, which replace the previous 1982 regulations, came into force in 2003. They are aimed at upgrading the EIA system in Israel, helping to introduce environmental considerations in earlier stages of planning and decision making, and incorporating sustainable development principles in EIAAs. The regulations broaden the possibilities for requiring EIAs for proposed development in environmentally sensitive areas, including coasts and riverbanks.
### Action r2.2.vi.- Establish contact with the relevant national contact points from within the networks of the International Association for Impact Assessment with a view to identifying sources of expertise and advice for assisting with wetland-related impact assessment. (Resolution VIII.9)

1. Experts from the International Association for Impact assessment have been involved in EIA processes in the country
   - **C**
   - **Choose an answer**
     - A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

2. - Implementation progress since COP8
   - Please include additional comments on the involvement of IAIA experts in EIA processes in the country.

<table>
<thead>
<tr>
<th>Action r2.2.vii.- Provide impact assessment materials relevant to wetlands, including case studies indicating lessons learned, guidelines, sources of advice, and other relevant materials, to the Bureau for incorporation into the IUCN Biodiversity Economics Web site. (Resolution VIII.9)</th>
</tr>
</thead>
</table>
| 1. EIA materials, including case studies, have been transmitted to the Ramsar Bureau for loading in the EIA-dedicated Web site
   - **C**
   - **Choose an answer**
     - A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

2. - Implementation progress since COP8
   - Please include additional comments on EIA materials.
     - EIA materials are in Hebrew.

### Action 2.2.4.- Promote the continuing development, wide dissemination - primarily through the Internet-based resource kit (http://www.biodiversityeconomics.org/assessment/ramsar-503-01.htm) and application of methodologies to undertake valuations of the economic, social and environmental benefits and functions of wetlands, in collaboration with the International Association of Impact Assessment (IAIA), Ramsar’s International Organization Partners, and interested Parties and organizations.

**GLOBAL TARGET 2003-2005: STRP to have made progress on methodologies for economic, social and environmental valuation, and all CPs with experience in this area to have engaged in the STRP work.**

1. Progress has been made in the development and/or application of methodologies for the valuation of economic, social and environmental benefits and functions of wetlands
   - **D**
   - **Choose an answer for each indicator**
     - A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

2. The Party has contributed to the STRP work on methodologies for economic, social and environmental valuation of wetland benefits and functions
   - **C**
   - **Choose an answer**
     - A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

3. - Implementation progress since COP8
   - Please include additional comments on progress made and contribution to STRP work, if applicable.

The document on “Policy and Planning Principles for the Rivers of Israel” calls for the development of models to economically assess the benefits of the river, based on real estate values, tourism and recreation, flood prevention, etc.

A national policy on the environmental, economic and social impacts of declining water levels in the Dead Sea is currently being prepared. Four teams were assembled to formulate the document: a multidisciplinary team, an economic team, an ecological and environmental team, and a legal and public administration team.

Different scenarios are currently being examined along with their potential costs – social, economic and environmental.

Documents on the economic value of open spaces have been prepared. Dr. Nir Becker of the Department of Natural Resources and Environmental Management of Haifa University has published research on the subject of environmental economics, in general, and economic evaluation of open spaces and water resources, in particular.

Recognition of the environmental, social and economic benefits of wetlands has led to plans for the development of metropolitan parks in the environs of rivers.
OPERATIONAL OBJECTIVE 3. INTEGRATION OF WETLAND WISE USE INTO SUSTAINABLE DEVELOPMENT

OPERATIONAL OBJECTIVE 3.1. Develop and disseminate methodologies to achieve the conservation and wise use of wetlands

PLANNING TOOL SECTION

| PRIORITY: | B | A= High; B= Medium; C= Low; D= Not relevant; E= No answer |
| RESOURCING: | C | A= Good; B= Adequate; C= Limiting; D= Severely limiting; E= No answer |
| TARGETS (text answer): | To develop and implement methodologies for the conservation, rehabilitation and wise use of wetlands |
| PLANNED ACTIVITIES (text answer): | To advance monitoring and assessment and preparation and updating of master plans for all water resources, including rivers, wetlands and water supply reservoirs. To implement methodologies for the restoration and conservation of wetlands during emergency periods of drought. |

COP9 REPORT SECTION

Action 3.1.1.- Review the wise use concept, its applicability, and its consistency with the objectives of sustainable development.

GLOBAL TARGET 2003-2005: STRP to spearhead process of reviewing and updating guidance on the wise use concept, including the ecosystem approach, in particular in line with the outcomes of WSSD.

1. Work has been done to review the wise use concept, its applicability and its consistency with the objectives of sustainable development  
   D Choose an answer for each indicator  
   A = Not applicable; B = Yes; C = No;  
   D = Partly/in some cases; E = In progress;  
   F= Being planned; G = Being updated;  
   H = Other status (explain below); I = No answer

2. The Party has contributed to the STRP work to review and update the guidance on the wise use concept, including the ecosystem approach  
   C

3.- Implementation progress since COP8 [Please include additional comments on the revision of the wise use concept and contribution to STRP work, if applicable.]

The wise use concept has been applied to river restoration plans, to the Sea of Galilee, and to the management of Israel’s water resources in general (within the framework of a master plan that endeavors to close the gap between supply and demand).

Action 3.1.2.- Compile advice, methods and best practice studies for the wise use of wetlands, including the application of the ecosystem approach, and disseminate these to wetland managers

1. Advice, methods and best practice studies on the wise use of wetlands, including the application of the ecosystem approach, have been compiled and distributed to wetland managers  
   D Choose an answer  
   A = Not applicable; B = Yes; C = No;  
   D = Partly/in some cases; E = In progress;  
   F= Being planned;  
   G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Documentation on the wise use of rivers is published and disseminated in Hebrew.

Action 3.1.3.- Ensure that the principles embodied in the Convention’s new management planning guidelines adopted by Resolution VIII.14 are applied to decision-making about, and the wise use of, all wetlands.

GLOBAL TARGET 2003-2005: All CPs to consider how to adapt and to incorporate, as necessary, into national practice the new management planning guidelines to the wise use of all wetlands.
1. Ramsar’s new management planning guidelines (Resolution VIII.14) have been adapted and incorporated into national practice

<table>
<thead>
<tr>
<th>D</th>
<th>Choose an answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Some elements of the management planning guidelines have been incorporated into national practice. This is especially so in the case of the country’s river restoration plans and management plans for the Sea of Galilee. At present management plans are also being promoted in nature reserves and national parks which contain wetlands, especially in relation to the allocation of water.

Action 3.1.4.- Disseminate and encourage the use of the Convention’s guidance on the wise use concept to governments, responsible agencies and bilateral and multilateral donor organizations, in order to assist their development and implementation of sustainable development funding policies that fully address the conservation and wise use of wetlands.

<table>
<thead>
<tr>
<th>D</th>
<th>Choose an answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Information on water allocation to wetlands has been disseminated to decision-makers in Israel.

Action r3.1.i.- Share information, expertise and experience concerning the study, conservation and wise use of mountain and high altitude wetlands, and develop, as appropriate, national, regional or local strategies and plans for their conservation and wise use, particularly with a view to strengthening coordination of Ramsar implementation with work underway in the framework of bilateral and multilateral environmental agreements, especially the Convention on Biological Diversity and the UN Framework Convention on Climate Change, and those agreements dealing specifically with mountains, as well as with the initiatives of international organizations, including the United Nations Development Programme (UNDP), with the Bureau to report on progress to COP9. (Resolution VIII.12)

Action r3.1.iii.- Establish, with the support of IOPs and other partners and collaborators of the Convention, specific work programmes for high Andean wetlands and the basins fed by them, in order to preserve their valuable biodiversity, their function as regulators of water, and as living space of many local and peasant communities and indigenous peoples. (Resolution VIII.39)
1. Specific work programmes for the wise use of high Andean wetlands and the basins fed by them have been established

A

Choose an answer
A = Not applicable; B = Yes; C = No; D = Partially in some cases;
E = In progress; F = Being planned; G = Being updated;
H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Action r3.1.v.- Exchange information relating to the conservation, integrated management and sustainable use of mangrove ecosystems, especially where this involves the full participation of local communities and indigenous peoples. (Resolution VIII.32)

1. Information relating to the conservation, integrated management and sustainable use of mangrove ecosystems, especially in relation to the participation of local communities and indigenous people, has been exchanged with other Parties and institutions

A

Choose an answer
A = Not applicable; B = Yes; C = No;
D = Partially in some cases; E = In progress;
F = Being planned; G = Being updated;
H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

OPERATIONAL OBJECTIVE 3. INTEGRATION OF WETLAND WISE USE INTO SUSTAINABLE DEVELOPMENT

OPERATIONAL OBJECTIVE 3.2. Ensure the conservation and wise use of peatlands as a demonstration of the ecosystem-based approach under the Convention

Go to previous Operational Objective  Go to next Operational Objective  - Go to Table of Contents

PLANNING TOOL SECTION

PRIORITY: D

A = High; B = Medium; C = Low; D = Not relevant; E = No answer

RESOURCING: E

A = Good; B = Adequate; C = Limiting; D = Severely limiting; E = No answer

TARGETS (text answer): This objective is not relevant to Israel

PLANNED ACTIVITIES (text answer):

COP9 REPORT SECTION

Action r3.2.i.- Establish a Coordinating Committee for Global Action on Peatlands and prepare an implementation plan for global action on peatlands. (Resolution VIII.17)

1. The Party has participated in the Ramsar Bureau-led process to establish a Coordinating Committee for Global Action on Peatlands

A

Choose an answer
A = Not applicable; B = Yes; C = No; D = Partially in some cases; E = In progress; F = Being planned; G = Being updated;
H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Action 3.2.1.- Implement the Guidelines for global action on peatlands as adopted by Resolution VIII.17, noting the priority sought therein for inventories of peatlands, the protection and possible designation of peatlands as Ramsar sites, the transfer of peatland restoration technology, and the maintenance of the cultural significance of peatlands, and implement those actions identified as national priorities.
1. Action has been taken to implement at national level the Guidelines for Global Action on Peatlands (Resolution VIII.17)  

<table>
<thead>

<td>A= Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

2.- Status and trends in national peatland resources [Please include information on the conservation status and trends of peatland resources and provide reference citation to any relevant publications, reports or analyses.]

**OPERATIONAL OBJECTIVE 3. INTEGRATION OF WETLAND WISE USE INTO SUSTAINABLE DEVELOPMENT**

**OPERATIONAL OBJECTIVE 3.3. Increase recognition of the significance of wetlands for reasons of water supply, coastal protection, flood defense, food security, poverty alleviation, cultural heritage, and scientific research**

**PLANNING TOOL SECTION**

| PRIORITY: | A= High; B= Medium; C= Low; D= Not relevant; E= No answer |
| RESOURCING: | B= Good; C= Adequate; D= Limiting; E= Severely limiting; F= Yearly limiting; G= Not relevant; H= No answer |
| TARGETS (text answer): | To assure recognition of the importance of wetlands for water supply, coastal protection, flood defense, cultural heritage and social value. |
| PLANNED ACTIVITIES (text answer): | To prepare reports and disseminate information on the services provided by wetlands. |
**Action 3.3.1.-** As part of national (or, as appropriate, provincial) wetland inventories, assess and document wetlands which are of special significance for reasons of water supply, coastal protection, flood defense, food security, poverty alleviation, cultural heritage, and/or scientific research, and, where appropriate, seek to have these sites protected in recognition of these values.

See action 1.1.2

| 1. Measures have been taken to protect wetlands which are of special significance for reasons of water supply, coastal protection, flood defense, food security, poverty alleviation, cultural heritage, and/or scientific research | B |
| 2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.] |

The Sea of Galilee is a major source of water for Israel and major efforts have been taken to protect it for water supply, scientific research and recreational value. Special attention is paid to the restoration of rivers on the Mediterranean coast, in particular, and in the periphery of the country or in the environs of urban centers in order to provide the population, including weaker groups, leisure and recreational possibilities. In some sites, such as in the Tanninim River Restoration project, efforts focus on better drainage and the prevention of flooding, preservation and cultivation of natural and landscape assets and exposure of an entire complex of ancient water systems, which are considered to be of international significance. At the En Afeq Nature Reserve, a Ramsar Site, special attention is devoted also to the preservation of historical sites alongside education and scientific research. The site boasts an educational center along with an ecological and biological center, which serve youngsters and professionals alike. Ein Afeq has become an important educational and research center on the management of wetlands under conditions of water scarcity.

**Action 3.3.3.-** Consider using the guiding principles in Annex I of Resolution VIII.19 to promote full recognition of the social and cultural heritage of wetlands, and ensure that this is fully appreciated and taken into account in their wise use and management.

See actions r2.2.ii, 6.1.6

| 1. Actions have been taken to promote the recognition of the social and cultural heritage of wetlands | D |
| 2. The social and cultural heritage of wetlands is being taken into account in their wise use and management | B |
| 3.- Implementation progress since COP8 [Please include additional comments on the recognition of social and cultural heritage of wetlands.] |

Israel’s “Policy and Planning Principles on the Rivers of Israel” calls for emphasis on the social and cultural heritage of rivers. In areas where cultural and historic sites occur in the vicinity of wetlands, special efforts are made to restore and protect them. An Israeli Forum for Ecological Art exists in Israel and some of the artistic creations relate to wetlands protection as a means of raising public consciousness.

**Action r3.3.ii.-** Urge public institutions to ensure that a more decisive effort be made with regard to groundwater, placing emphasis on the hydro-geological, social, economic and environmental aspects within the framework of communication, education and public awareness (CEPA) regarding wetlands. (Resolution VIII.40)
1. Actions have been taken to ensure that public institutions place emphasis on the hydrogeological, social, economic and environmental aspects of groundwater management.

2. Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

The drought years which affected Israel led to an increased emphasis on all aspects of groundwater management.

Action r3.3.iii.- Within national and legal frameworks and available resources and capacity, consider inter alia the compilation and assessment of both material and non-material cultural elements related to wetlands and water, taking into account, as appropriate, intellectual property rights, customary law, and the principle of prior informed consent, in accordance with CBD and WIPO rules; promoting the appreciation and revitalization of these cultural values among populations close to wetlands, and in general among the wider public; including all relevant aspects of cultural heritage in the design and implementation of wetland management, carrying out such efforts with active participation of indigenous peoples, local communities and other stakeholders; and consider using the cultural values of wetlands as a tool to strengthen this involvement, particularly in wetland planning and management. (Resolution VIII.19)

1. Compilation(s) and assessment(s) of both material and non-material cultural elements related to wetlands and water have been undertaken

2. Actions have been taken to promote the appreciation and revitalization of cultural values related to wetlands and water

3. All relevant aspects of cultural heritage have been incorporated in the design and implementation of wetland management

4. Cultural values of wetlands have been used as a tool to strengthen involvement of local stakeholders, particularly in wetland planning and management

5. Implementation progress since COP8 [Please include additional comments on the actions made to take into consideration cultural heritage and values of wetlands.]

Within the framework of river restoration, assessments take account of cultural elements and master plans for river restoration relate to these elements. In general emphasis is placed on the social aspects of wetland conservation for the enjoyment of the population.

Action 3.3.4.- Develop and implement wise use wetland programmes and projects that contribute to poverty alleviation objectives and food and water security plans at local, national and regional levels.

1. Wise use wetland programmes and/or projects that contribute to poverty alleviation objectives and food and water security plans have been developed

2. Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Israel’s “National Master Plan for the Water Sector” relates to all aspects of water supply. Water security is a top priority item on Israel's agenda and therefore desalination plans, wastewater treatment plans and conservation plans are being promoted.

Action 3.3.5.- Promote research, including through the establishment of national and regional research and training centres, into the role of wetlands in water supply, coastal protection, flood defense, food security, poverty alleviation, and cultural heritage.
1. Research has been promoted on the role of wetlands in any of the following areas: water supply, coastal protection, flood defense, food security, poverty alleviation, and cultural heritage

B

Choose an answer
A = Not applicable; B = Yes; C = No;
D = Partly/in some cases; E = In progress;
F = Being planned; G = Being updated;
H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]
Research is undertaken at academic institutions and the Hydrological Service of the Water Commission. The research committee of the Water Commissioner promotes financing and directs research on water issues as well as other such committees at the Ministry of Agriculture and Ministry of the Environment.

Action r3.3.v.- Secure the wise use of temporary pools through ensuring, as a high priority, that their management is sustainable, respecting their specific characteristics and addressing root causes of their loss and degradation, taking into consideration the guidance in Resolution VIII.33, and including by:

i) undertaking, as far as possible, baseline inventory of temporary pools;
ii) raising awareness of their presence and their specific values and functions;
iii) ensuring the maintenance of their specific hydrological functioning;
iv) ensuring that their natural resources are sustainably used and not overexploited;
v) recognizing the commitment to, and importance of, temporary pools to local communities and indigenous peoples, and supporting their management and protection; and
vi) undertaking regular surveillance of temporary pools so as to identify and avert any threat to their values and functions, always considering the traditional uses and management. (Resolution VIII.33)

1. Actions have been taken to secure the wise use of temporary pools

B

Choose an answer
A = Not applicable; B = Yes; C = No;
D = Partly/in some cases; E = In progress;
F = Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]
Since agricultural and urban development have led to a disappearance of most of the country’s temporary pools, efforts are made on preserving and restoring those pools that have remained. In some cases, these pools have been declared nature reserves and in other cases, nature reserves include temporary pools. Every year a number of pools are dug and restored. Surveys of amphibian life and biological surveys are undertaken. Temporary pools are protected both for conservation purposes and, in some cases, as a source of drinking water for animals.

OPERATIONAL OBJECTIVE 3. INTEGRATION OF WETLAND WISE USE INTO SUSTAINABLE DEVELOPMENT

OPERATIONAL OBJECTIVE 3.4. Integrate policies on the conservation and wise use of wetlands in the planning activities in all Contracting Parties, and in decision-making processes at national, regional, provincial and local levels, particularly concerning territorial management, groundwater management, catchment/river basin management, coastal and marine zone planning, and responses to climate change
**PLANNED ACTIVITIES**

To update the “Master Plan for the Water Sector”, establish seawater and brackish water desalination facilities, import water, promote river basin management and coastal and marine zone planning.

**COP9 REPORT SECTION**

**Action 3.4.2.-** Apply the Guidelines in *Integrating wetland conservation and wise use into river basin management* (Ramsar Wise Use Handbook 4) and, where appropriate and feasible, participate in the related CBD/Ramsar project entitled the “River Basin Initiative” so as to support the WSSD agreement to increase understanding of the sustainable use, protection and management of water resources.

<table>
<thead>
<tr>

<td></td>
<td></td>
</tr>
</tbody>
</table>

**2.- Implementation progress since COP8** [Please include additional comments on application of the Guidelines for integrating wetland conservation and wise use into river basin management.]

Israel's river restoration plans are based on a river basin approach. A National River Administration oversees the restoration of the country's rivers. The Administration coordinates responsibilities, financial resources and professional knowledge in cooperation with several stakeholders, but entrusts actual restoration work to a regional administration. The regional administration is comprised of representatives of local authorities, drainage authorities, relevant regional organizations, representatives of green bodies and representatives of the National River Administration.

The National Administration is dedicated to the following primary goals:

- Restoration of rivers through clean up and prevention of pollution, release of sufficient quantities of good quality water to river channels, and rehabilitation of adjacent landscapes and ecosystems;
- Promotion of the ability of rivers to serve as drainage channels for flood control;
- Controlled development in the environs of rivers on the basis of existing and potential nature and landscape values for purposes of nature protection, recreation, tourism, education and research.

</tbody>
</table>

2. Implementation progress since COP8 [Please include additional comments on the implementation of this action.]
Integrated coastal zone management takes account of coastal rivers and prevention of land-based pollution. A Law for the Protection of the Coastal Environment was enacted in 2004.

**Action r3.4.vi.** - Document case studies of good practice in the integration of wetlands into ICZM and make these available to the Convention for review by the Scientific and Technical Review Panel (STRP) as the basis for preparing further guidance on wetlands and ICZM under the Convention. (Resolution VIII. 4)

1. **Case studies of good practice examples on the integration of wetlands into Integrated Coastal Zone Management** have been transmitted to the Ramsar Bureau. **C**

2. **Implementation progress since COP8 [Please include additional comments on the implementation of this action.]**

**Action 3.4.6.** - In decision-making processes related to freshwater resources, apply the Guidelines for the allocation and management of water for maintaining the ecological functions of wetlands, as adopted by Resolution VIII.1.

**GLOBAL TARGET 2003-2005:** All CPs to have made available the guidance on water allocation and management for ecosystems to support decision-making on water resource management in all CPs, as a contribution to achieving the WSSD target on water resources management and water efficiency plans.

1. **The Guidelines for allocation and management of water for maintaining ecological functions of wetlands (Resolution VIII.1) have been used/applied in decision-making related to freshwater.** **E**

2. **Implementation progress since COP8 [Please include additional comments on the implementation of this action.]**

**Action r3.4.viii.** - Bring the Guidelines for allocation and management of water for maintaining the ecological functions of wetlands and the additional guidance on tools and methodologies to the attention of national ministries and/or agencies (at different levels of territorial organization) responsible for water resource management; encourage these bodies to apply the guidance in order to ensure appropriate allocation and management of water for maintaining the ecological functions of wetlands in their territory; ensure that the principles contained in the Ramsar Guidelines are incorporated into national policies on water and on wetlands; and include representatives of national water management ministries and/or agencies in the membership of National Ramsar/Wetland Committees. (Resolution VIII.1)

**See action 18.1.2**

1. **Representatives of national water management ministries and/or agencies are included in National Ramsar/Wetland Committee.** **B**

2. **Implementation progress since COP8 [Please include additional comments on the implementation of this action.]**

**Action r3.4.ix.** - Develop projects and other activities that promote and demonstrate good practice in water allocation and management for maintaining the ecological functions of wetlands, make such good practice examples available to others through the information exchange mechanisms of the Ramsar/CBD River Basin Initiative, and report to COP9 on the successes achieved and lessons learned from these activities. (Resolution VIII.1)

**See action 18.1.2**

1. **Representatives of national water management ministries and/or agencies are included in National Ramsar/Wetland Committee.** **B**

2. **Implementation progress since COP8 [Please include additional comments on the implementation of this action.]**

Israel's Ramsar Committee includes representatives of the Ministries of Foreign Affairs, Infrastructure, Environment, Justice, Agriculture and the Nature and Parks Authority.
1. Projects that promote and demonstrate good practice in water allocation and management for maintaining the ecological functions of wetlands have been developed

<table>
<thead>
<tr>
<th></th>

</tr>
</tbody>
</table>

2.- Implementation progress since COP8 [Please include information on the relevant projects.]

Scientific studies have been conducted to assess water allocation needs in maintaining the ecological functions of rivers and wetlands within nature reserves and national parks.

3.- Summary on successes achieved and lessons learned in developing this type of projects [Please provide a summary on the relevant projects, successes achieved, and lessons learned in their development.]

In the aftermath of a series of drought years, assessments of the water allocation needs of wetlands have been undertaken and published, an inventory of wetlands that require rehabilitation has been prepared and rehabilitation plans based on engineering and other solutions have been initiated, especially in the country’s Ramsar sites but also in other sites.

Action r3.4.x. Develop mechanisms to better plan and manage for the wise use of water in the Andean region. (Resolution VIII.39)

<table>

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Overexploitation of groundwater in Israel has impacted the conservation of wetlands. Interdisciplinary studies on this subject are ongoing in Israel.

Action r3.4.xv. Promote proposals for the participation of civil society, both public and private, related to the management of groundwater within the framework of integrated management of water resources. (Resolution VIII.40)
### Action 3.4.9.-
Ensure that national policy responses to the implementation of the Kyoto Protocol, including revegetation and management, afforestation and reforestation do not lead to damage to the ecological character of wetlands.

**GLOBAL TARGET 2003-2005:** All relevant CPs to have assessed implications of Kyoto Protocol implementation on wetlands (including applying COP8 restoration guidelines).

<table>
<thead>
<tr>
<th>1. The implications of implementation of the Kyoto Protocol for wetland conservation have been assessed</th>

2.- Implementation progress since COP8 *[Please include additional comments on the implementation of this action.]*

Israel considered some implications of climate change on wetland conservation issues in its National Report on Climate Change (2000).

### Action r3.4.xvi.-
Make every effort, when implementing UNFCCC and, where appropriate, its Kyoto Protocol, including revegetation and forest management, afforestation and reforestation, that this implementation does not lead to serious damage to the ecological character of their wetlands, using, where appropriate, strategic and other forms of environmental impact assessment and risk assessment, taking account Resolutions VII.10, VII.16 and VIII.9, as well as Article 4.1 of the UNFCCC and Article 2.1 of the Kyoto Protocol, as appropriate. (Resolution VIII.3)

1. Efforts have been made to avoid serious damage to the ecological character of wetlands due to the implementation of UNFCCC and its Kyoto Protocol | D | Choose an answer |

OPERATIONAL OBJECTIVE 4. RESTORATION AND REHABILITATION

OPERATIONAL OBJECTIVE 4.1. Identify priority wetlands where restoration or rehabilitation would be beneficial and yield long-term environmental, social or economic benefits, and implement the necessary measures to recover these sites

PLANNING TOOL SECTION

PRIORITY: A  
RESOURCING: C  
TARGETS (text answer): To continue to implement programs for the restoration and rehabilitation of wetlands.

PLANNED ACTIVITIES (text answer): The Nature and Parks Authority is implementing rehabilitation plans in priority wetlands throughout the country, based on a comprehensive survey. The aim is to continue to prepare plans and programs for rehabilitation and to advance the allocation of water to these wetlands. In addition, the Environment Ministry is promoting the implementation of upgraded effluent quality standards which are designed, inter alia, to minimize potential damage to water sources.

COP9 REPORT SECTION

Action 4.1.2.- Establish wetland restoration/rehabilitation programmes, where feasible, at destroyed or degraded wetlands, especially in those associated with major river systems or areas of high nature conservation value, in line with Recommendation 4.1 and Resolutions VII.17 and VII.20.

GLOBAL TARGET 2003-2005: All CPs with lost or degraded wetlands to have identified priority sites for restoration; restoration projects underway or completed in at least 100 CPs.

Action 4.1.2.- Établir, lorsque c’est possible, des programmes de restauration/remise en état des zones humides détruites ou dégradées, en particulier dans les grands bassins hydrographiques ou les régions très importantes pour la conservation de la nature, conformément à la Recommandation 4.1 et aux Résolutions VII.17 et VII.20.

1. Wetland restoration / rehabilitation programmes or projects have been developed  
   B  
   Choose an answer  
   A = Not applicable; B = Yes; C = No; D = Partly/in some cases;  
   E = In progress; F= Being planned;  G = Being updated;  
   H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Action r4.1.i.- Report on progress in implementation of Actions 4.1.1 and 4.1.2 in triennial National Reports to the COP (Resolution VIII.16).

See action 1.1.2

1.- Actions have been taken to restore / rehabilitate those wetlands defined as priority for restoration (if available, please include number of sites)  
   B  
   Choose an answer  
   A = Not applicable; B = Yes; C = No;  
   D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated;  
   H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

In light of an assessment of wetlands in Israel, the Nature and Parks Authority has prepared a list of 20 priority wetlands for restoration or rehabilitation and efforts have been invested to assure water supplies for their
conservation and restoration. In the Ramsar site, the Hula Nature Reserve, large-scale restoration is now being implemented while in the Ramsar site of En Afeq, large-scale restoration is being planned. Furthermore, the Ministry of the Environment, in cooperation with the Jewish National Fund, governmental and non-governmental organizations and local authorities, is implementing river restoration plans. The master plans are based on detailed surveys of pollution sources, sensitive areas in terms of flora, flora and ecosystems, and estimates of water quantities and qualities required to support river restoration.

**Action r4.1.ii.-** Integrate fully the *Principles and guidelines for wetland restoration* (Resolution VIII.16) into National Wetland Policies and plans, paying particular attention to issues of legislation, impact assessment, incentive measures, and the mitigation of impacts of climate change and sea-level rise. (Resolution VIII.16).

1. The *Principles and guidelines for wetland restoration* (Resolution VIII.16) have been integrated into the National Wetland Policy or equivalent instrument(s)  

**Choose an answer**  
A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Israel’s river restoration projects take account of these principles and guidelines since they include goals and objectives and are based on careful planning with the participation of all stakeholders. In addition, the document “Nature’s Right to Water” takes account of water allocation principles and the role that restoration can play in maintaining ecological functions of wetlands.

**Action r4.1.iii.-** Pay particular attention to the role of wetland restoration in management at the catchment and river basin level in relation to the allocation and management of water for maintaining ecological functions (Resolution VII.1), integrating the conservation and wise use of wetlands into river basin management (Resolution VII.18), and transboundary action (Resolution VII.19). (Resolution VIII.16).

1. The role of wetland restoration has been taken into account in river basin management  

**Choose an answer**  
A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Israel’s river restoration policy relates to the entire river basin. Furthermore, drainage authorities participate with river authorities in river restoration plans.

**Action 4.1.3.-** Compile information on new research and methodologies for the restoration and rehabilitation of lost or degraded wetlands and disseminate this information.

1. Information and/or case studies on wetland restoration and rehabilitation is available  

**Choose an answer for each indicator**  
A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

2. Information on new research and methodologies for wetland restoration/rehabilitation has been compiled and disseminated  

**Choose an answer**  
B

3.- Implementation progress since COP8 [Please include additional comments on the information on restoration/rehabilitation of wetlands and its dissemination.]

Information on wetland restoration is constantly being updated but is available only in Hebrew.

**Action 4.1.4.-** Apply the guidelines on wetland restoration adopted by Resolution VIII.16 to ensure that national policy responses to the implementation of the Kyoto Protocol, including revegetation and management, afforestation and reforestation, do not lead to damage to the ecological character of wetlands.
### See action 3.4.9

**1. The Principles and guidelines on wetland restoration (Resolution VIII.16) have been used in the assessment of the implications of the implementation of the Kyoto Protocol for wetland conservation**

<table>
<thead>
<tr>
<th></th>
<th>Choose an answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>C</td>
<td>A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

**2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]**

---

### Action r4.1.iv.- Apply the Principles and guidelines for wetland restoration when considering the provision of compensation under Article 4.2 of the Convention, using the guidelines for such provision of compensation adopted by Resolution VIII.20. (Resolution VIII.16)

**1. The Principles and guidelines on wetland restoration (Resolution VIII.16) have been applied in relation to the provision of compensation under Article 4.2 of the Convention**

<table>
<thead>
<tr>
<th></th>
<th>Choose an answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

**2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]**

---

### Action r4.1.v.- Ensure, when implementing the Principles and guidelines for wetland restoration, that the cultural and archaeological heritage significance of wetlands being considered for restoration is fully recognized so as to ensure that this significance is maintained, taking into account the Guiding principles for taking into account the cultural values of wetlands for the effective management of sites, annexed to Resolution VIII.19. (Resolution VIII.16).

**See action r3.3.iii**

**1. Cultural and archaeological heritage significance of wetlands has been considered in restoration actions**

<table>
<thead>
<tr>
<th></th>
<th>Choose an answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>B</td>
<td>A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

**2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]**

Cultural and archaeological elements are an important part of restoration plans, especially in national parks. For example, in the case of the restoration project for the coastal Tanninim River Nature Reserve, the Antiquities Authority, which is an active member of the river administration, is concentrating special efforts on restoring a 193 meter long dam, which has operated continuously in the area from the Roman period, as well as on restoring flour mills.

### Action r4.1.vi.- Identify, as part of national training needs assessments, training needs in wetland restoration, identify training opportunities and expertise in wetland restoration, and create relevant training modules as part of the Ramsar Wetland Training Initiative, once established. (Resolution VIII.16). (Refer also to Action 20.1.5)

**See action 20.1.5**

**1. Training needs in relation to wetland restoration have been assessed**

<table>
<thead>
<tr>
<th></th>
<th>Choose an answer for each indicator</th>
</tr>
</thead>
<tbody>
<tr>
<td>D</td>
<td>A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

**2. Training opportunities and expertise in relation to wetland restoration have been identified**

<table>
<thead>
<tr>
<th></th>
<th>Choose an answer for each indicator</th>
</tr>
</thead>
<tbody>
<tr>
<td>D</td>
<td>A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

**3.- Implementation progress since COP8 [Please include additional comments on training needs and opportunities in relation to wetland restoration.]**

The Nature and Parks Authority and the Ministry of the Environment hold training sessions for staffers.
**Action r4.1.vii.** Investigate opportunities to link poverty relief to wetland restoration, by incorporating the provision of work, skills and opportunities into restoration projects and by focusing on the restoration of ecosystem goods and services upon which communities depend. (Resolution VIII.16).

1. **Restoration projects linked to poverty relief have been developed and implemented**
   - Choose an answer
     - A = Not applicable
     - B = Yes
     - C = No
     - D = Partly/in some cases
     - E = In progress
     - F = Being planned
     - G = Being updated
     - H = Other status (explain below)
     - I = No answer

2. **Implementation progress since COP8** [Please include additional comments on the implementation of this action.]
   - River restoration project focus on the provision of recreational services to all segments of the population, including weaker communities.

**Action r4.1.viii.** Disseminate the Principles and guidelines for wetland restoration (Resolution VIII.16) to community stakeholders who have an interest in wetland restoration; and involve local communities and indigenous peoples in restoring and maintaining wetlands, in line with the guidance in Resolution VII.8 concerning establishing and strengthening local communities’ and indigenous peoples’ participation in the management of wetlands. (Resolution VIII.16).

1. The Principles and guidelines for wetland restoration have been disseminated to community stakeholders
   - Choose an answer
     - A = Not applicable
     - B = Yes
     - C = No

2. Local communities and indigenous peoples have been involved in wetland restoration activities
   - Choose an answer for each indicator
     - A = Not applicable
     - B = Yes
     - C = No
     - D = Partly/in some cases
     - E = In progress
     - F = Being planned
     - G = Being updated
     - H = Other status (explain below)
     - I = No answer

3. **Implementation progress since COP8** [Please include additional comments on the dissemination of the Principles and guidelines for wetland restoration and the involvement of local communities and indigenous peoples in wetland restoration.]
   - Public hearings are held when planning for the rehabilitation of wetlands. In addition, Israel’s NGOs and grassroot organizations are involved in wetland restoration plans and activities. Cleanup campaigns along river banks, with the participation of local communities, are organized.

**Action r4.1.ix.** Utilise the information and resources of Ramsar’s restoration Web site, and contribute relevant additional information on wetland restoration projects and experience to this Web site, so as to increase the wide availability of such information, and particularly to provide demonstration projects that illustrate the application of the principles and guidelines adopted by Resolution VIII.16. (Resolution VIII.16)

1. The Ramsar Web site on wetland restoration has been used and materials have been provided to it
   - Choose an answer
     - A = Not applicable
     - B = Yes
     - C = No
     - D = Partly/in some cases
     - E = In progress
     - F = Being planned
     - G = Being updated
     - H = Other status (explain below)
     - I = No answer

2. **Implementation progress since COP8** [Please include additional comments on the use of Ramsar web site on wetland restoration and the materials provided to it, if applicable.]
   - Israel has accessed the material provided on the website on wetland restoration.

**Action r4.1.xi.** Prepare guidance on compensation for wetland losses in response to Resolution VII.24, and report on these matters to COP9. (Resolution VIII.16)

1. Contribution has been made to preparation of guidance on compensation for wetland losses, in response to Resolution VII.24
   - Choose an answer
     - A = Not applicable
     - B = Yes
     - C = No
     - D = Partly/in some cases
     - E = In progress
     - F = Being planned
     - G = Being updated
     - H = Other status (explain below)
     - I = No answer

2. **Implementation progress since COP8** [Please include additional comments on the implementation of this action.]
   - Israel has accessed the material provided on the website on wetland restoration.
OPERATIONAL OBJECTIVE 5. INVASIVE ALIEN SPECIES

OPERATIONAL OBJECTIVE 5.1. Develop guidance and promote protocols and actions to prevent, control or eradicate invasive alien species in wetland systems

PLANNING TOOL SECTION

| PRIORITY: | B  | A= High; B= Medium; C= Low; D= Not relevant; E= No answer |
| RESOURCING: | C  | A= Good; B= Adequate; C= Limiting; D= Severely limiting; E= No answer |
| TARGETS (text answer): | To upgrade the development of guidelines on the prevention, control and eradication of invasive alien species in wetland systems. |
| PLANNED ACTIVITIES (text answer): | Over the past year, new importance has been accorded to the subject of invasive alien species in wetland systems and high priority will be given to this subject in coming years. A committee on the subject has been appointed and the National Biodiversity Strategic Action Plan, which is currently in preparation, relates to the problem of invasive species. |

COP9 REPORT SECTION

Action r5.1.ii.- Work closely with counterpart national focal points for the Convention on Biological Diversity, the UN Convention to Combat Desertification, the UNESCO Man and the Biosphere Programme (MAB), the International Maritime Organization (IMO), and others in the development and implementation of national policies, strategies and management responses to threats from invasive alien species, and ensure that prevention, eradication and control of such species are fully incorporated in national legislation and national wetland and biodiversity policies, strategies and action plans, applying the Ramsar Guidelines for reviewing laws and institutions to promote the conservation and wise use of wetlands (Ramsar Handbook 3) and Guidelines for developing and implementing National Wetland Policies (Ramsar Handbook 2). (Resolution VIII.18)

1. National policy, strategy and management responses to threats from invasive species have been developed and implemented  E  Choose an answer for each indicator  
A = Not applicable;  
B = Yes;  
C = No;  
D = Partly/in some cases;  
E = In progress;  
F= Being planned;  
G = Being updated;  
H = Other status (explain below);  
I = No answer

2. Prevention, eradication and control of invasive alien species have been fully incorporated in national legislation and national wetland and biodiversity policies, strategies and action plans  E

3. Actions related to invasive species have been carried out in cooperation with the focal points of other conventions and international organizations/processes  E

4.- Implementation progress since COP8 [Please include additional comments on incorporation of invasive species matters in national legislation and policies, actions taken, and cooperation in this field.]

Israel is now in the midst of preparing a National Biodiversity Strategic Action Plan in which policy on invasive species will be developed. Research is currently being undertaken to identify invasive species in different habitats and to propose prevention and control methods. One such species is the lutria (Myocastor coypus) which has spread to the Hula wetland area.

Action r5.1.iii.- Undertake risk assessments of alien species which may pose a threat to the ecological character of wetlands, taking into account the potential changes to ecosystems from the effects of global climate change, and applying the guidance available in Ramsar’s Wetland Risk Assessment Framework (Resolution VII.10). (Resolution VIII.18)
### 1. Risk assessments of alien species that pose a threat to wetlands have been undertaken

D  

**Choose an answer**

A = Not applicable; B = Yes; C = No; D = Partly/in some cases; 
E = In progress; F= Being planned; G = Being updated; 
H = Other status (explain below); I = No answer

### 2. Implementation progress since COP8  

**[Please include additional comments on the implementation of this action.]**

Risk assessments are largely undertaken by departments in the Ministry of Agriculture which are responsible for granting permits.

### Action r5.1.iv.-

- Identify the presence of invasive alien species in Ramsar sites and other wetlands in the Party’s territory, the threats they pose to the ecological character of these wetlands (including the risk of invasions by such species not yet present within each site), and the actions underway or planned for their prevention, eradication or control; for Ramsar sites, report on this to the Ramsar Bureau without delay in line with Article 3.2 of the Convention, so that this information may be included in the Ramsar Sites Database (refer also to Operational Objective 11.2); and make information provided by Contracting Parties available to the Convention on Biological Diversity and others in support of the implementation of the CBD-Ramsar Joint Work Plan 2002-2006. (Resolution VIII.18)

### 1.- Problems of invasion by alien species in Ramsar sites have been assessed and communicated to the Ramsar Bureau pursuant Article 3.2 of the Convention  

**[If applicable, please include number of sites]**

D  

**Choose an answer**

A = Not applicable; B = Yes; C = No; 
D = Partly/in some cases; E = In progress; 
F= Being planned; G = Being updated; 
H = Other status (explain below); I = No answer

### 2.- Implementation progress since COP8  

**[Please include information on the problems of invasion by alien species, sites affected and other additional comments you consider relevant.]**

The information has not been communicated to the Ramsar Bureau.

### Action r5.1.v.-

- Cooperate fully in the prevention, early warning in transboundary wetlands, eradication and control of invasive species concerning invasive species in shared wetlands, river systems, and coastal/marine zones, including examining carefully, prior to moving water between river basins, the potential environmental impacts due to invasive species, and applying the *Guidelines for international cooperation under the Ramsar Convention* (Ramsar Handbook 9) in recognition that many aquatic invasive species, both inland and coastal and marine species, can spread rapidly and repeatedly throughout entire wetland ecosystems, river basins and coastal and marine zones, such that eradication in one place may not prove effective at preventing further invasions. (Resolution VIII.18)

### 1. International cooperation related to invasive species in transboundary/shared wetlands and water systems has been agreed and implemented

D  

**Choose an answer**

A = Not applicable; B = Yes; C = No; D = Partly/in some cases; 
E = In progress; F= Being planned; G = Being updated; 
H = Other status (explain below); I = No answer

### 2.- Implementation progress since COP8  

**[Please include additional comments on the implementation of this action.]**

Regional cooperation has related to the invasion of Red Sea species (Lessepsian species).

Israel is a participant in the production of the CIESM Atlas of Exotic Species in the Mediterranean Sea, which is the first attempt to provide a comprehensive, group by group, survey of recent marine “immigrants” in the Mediterranean, which is undergoing drastic and rapid changes to its biota.

### Action 5.1.2.-

- In collaboration with the *Global Invasive Species Programme (GISP)*, the *Convention on Biological Diversity*, Ramsar’s International Organization Partners, and interested Parties, continue to develop and disseminate practical guidance for the prevention, control and eradication of invasive species, based on case studies and documented experiences from around the world.

**GLOBAL TARGET 2003-2005: Guidance for invasives’ management prepared.**
1. Practical guidance for the prevention, control and eradication of invasive species has been developed and disseminated

**E** Choose an answer
A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

In light of recent research studies, guidelines are now being developed. A professional seminar on the subject was held in Ben-Gurion University of the Negev, with the participation of other academic and professional bodies, in January 2005.

Action r5.1.ix.- In the development and implementation of national strategies and responses to invasive alien species, recognize that terrestrial invasions by alien species can threaten and affect the ecological character of wetlands, including through the lowering of water tables and alteration of water flow patterns, and ensure that appropriate measures to prevent or control such invasions are in place. (Resolution VIII.18)

1. The impact on wetlands of terrestrial invasions by alien species has been assessed

**D** Choose an answer
A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

As a result of a series of drought years and a lowering of water levels, invasions of flora have been noted. Efforts have focused on controlling the invasion of terrestrial species.

OPERATIONAL OBJECTIVE 6. LOCAL COMMUNITIES, INDIGENOUS PEOPLE AND CULTURAL VALUES

OPERATIONAL OBJECTIVE 6.1. Encourage active and informed participation of local communities and indigenous people, in particular women and youth, in the conservation and wise use of wetlands

**Go to previous Operational Objective** **Go to next Operational Objective** - **Go to Table of Contents**

PLANNING TOOL SECTION

| TARGETS (text answer): |
| To continue to encourage the participation of the general public in the conservation and wise use of wetlands |

| PLANNED ACTIVITIES (text answer): |
| To raise the awareness of the public of the importance of wetlands, both for ecosystem conservation and recreational purposes, through guidance, booklets, and internet sites. |

COP9 REPORT SECTION

Action 6.1.1.- Apply the Guidelines for establishing and strengthening local communities’ and indigenous people’s participation in the management of wetlands (Ramsar Wise Use Handbook 5), giving particular attention to the importance of incentive measures (refer to Operational Objective 8.1), the building of trust, the need for flexible approaches, the exchange of knowledge, capacity building and the continuity of resources and efforts.

1. The guidance for the participation of local communities and indigenous people in wetland management has been applied

**D** Choose an answer
A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer
2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Local communities are involved in cleanups and planning but not in the actual management of wetlands.

**Action 6.1.2.-** In consultation with and with the full support of indigenous people, document and encourage the application of appropriate traditional knowledge and management practices of indigenous people and local communities in the conservation and wise use of wetlands, particularly where wetlands are under the traditional ownership of local communities and indigenous people.

1. Traditional knowledge and management practices in relation to wetlands has been documented and its application encouraged

<p>| | |</p>

<td><strong>Choose an answer</strong>&lt;br&gt; A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

In the Hula and En Afeq Nature Reserves, use is made of the water buffalo to control vegetation.

**Action 6.1.4.-** Promote public participation in decision-making processes with respect to wetlands and their conservation and ensure that there is full sharing with the stakeholders of technical and other information related to the selection of Ramsar sites and management of all wetlands.

1.- Public participation in decision-making with respect to wetlands has been promoted

<p>| | |</p>

<tbody>
<tr>
<td>B</td>
<td><strong>Choose an answer</strong>&lt;br&gt; A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

2.- Implementation progress since COP8 [Please include information on the promotion of public participation in decision-making with respect to wetlands.]

The National Parks and Nature Reserves Law makes provision for public hearings which allow the public to learn about development plans for nature reserves and national parks and to respond to them. Representatives of public organizations including non-governmental environmental organizations, academic institutions, tour guide organizations, etc. are invited to attend public hearings on development plans and master plans for major reserves and parks.

Local authorities are represented on the National River Restoration Administration and regional organizations and green bodies in regional administrations. One of the stated aims of the National River Administration is: increasing public awareness and participation in river restoration and landscape protection.

Public participation is especially noteworthy in the restoration of the Alexander River. Communities adjacent to the river have taken an active part in the River Administration and have participated in all aspects of restoration – from formulating objectives and planning strategies to practical restoration activities. Several ecological restoration were undertaken in conjunction with students from nearby schools. Public participation was an important component in the decision to grant this restoration project the Thiess International Riverprize in 2003.

3.- Local stakeholders have been involved in the selection of new Ramsar sites (if applicable, please include number of sites)

<p>| | |</p>

</tr>
</tbody>
</table>

4.- Implementation progress since COP8 [Please include information on the participation of local stakeholders in Ramsar site selection, the sites involved (if applicable), and any other additional comments you consider relevant.]

**Action r6.1.i.-** Implement, where appropriate, Resolution VII.8 on Guidelines for establishing and strengthening local communities’ and indigenous people’s participation in the management of wetlands with respect to the planning and operation phases of dams, and extend this principle of participation to wider issues related to water resources management at basin level, utilising Resolution VII.18 on Guidelines for integrating wetland conservation and wise use into river basin management, and Resolution VIII.14 on New Guidelines for management planning for Ramsar sites and other wetlands. (Resolution VIII.2)
1. Local stakeholders have been involved in wider issues related to water resources management at basin level

Choose an answer
A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Representatives of local authorities and drainage authorities are involved in water resource management decisions at basin levels.

Action 6.1.5.- Elaborate for consideration by COP9 further guidance on the application of the Guidelines for establishing and strengthening local communities’ and indigenous people’s participation in the management of wetlands (Ramsar Wise Use Handbook 5), based on experiences gained at the field level, and in particular the experience of Pacific Island States and other Small Island Developing States, and working with the CBD and others in line with the CBD-Ramsar 3rd Joint Work Plan.

1. Resource information on local communities’ and indigenous people’s participation in wetland management has been compiled

Choose an answer
A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional information on the resources compiled about local communities’ and indigenous people’s participation in wetland management.]

Some information has been collected. This is especially so in the case of the Alexander River restoration project where public participation is a major element of the program.

3. The Party has contributed with case studies and other materials to the elaboration of further guidance on the participation of local communities and indigenous people in wetland management

Choose an answer
A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer

4.- Implementation progress since COP8 [Please include additional comments on the contribution to the elaboration of the guidance indicated above.]

1. Participatory Environmental Management strategies have been applied

Choose an answer
A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Summary on progress and successes in relation to Participatory Environmental Management strategies [Please provide here a summary on progress and successes and other additional comments you consider relevant.]

Participatory Environmental Management strategies are largely implemented by river drainage basin authorities and regional river restoration administrations. Participatory Environmental Management was an important component of the Alexander River Restoration Project which was granted an international prize, the Thiess International Riverprize, in 2003.

Action 6.1.6.- Consider using the Guiding principles for taking into account the cultural values of wetlands for the effective management of sites (Resolution VIII.19), and continue to document case studies on social and cultural values of wetlands and how they can be incorporated into the effort to conserve and sustainably use wetland resources.
### 1. The guiding principles on cultural values (Resolution VIII.19) have been used or applied

<table>
<thead>
<tr>
<th>Description</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
<td></td>
</tr>
</tbody>
</table>

#### 2.- Implementation progress since COP8 [Please include additional comments on the application of the Guiding Principles on cultural values.]

Since river restoration plans are also designated for public benefit, emphasis is placed on the conservation of cultural values.

### 3. Resource information and case studies on cultural aspects of wetlands have been compiled

<table>
<thead>
<tr>
<th>Description</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
<td></td>
</tr>
</tbody>
</table>

#### 4.- Implementation progress since COP8 [Please include additional comments on the resource information compiled.]

### Action r6.1.v.- Establish appropriate consultation mechanisms at regional or national levels, in order to consider how the list of Guiding Principles included in the Annex to Resolution VIII.19 might be applied in developing and promoting cultural values of wetlands. (Resolution VIII.19)

<table>
<thead>
<tr>
<th>Description</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
<td></td>
</tr>
</tbody>
</table>

#### 2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

### Action r6.1.vi.- Consider using the cultural values of wetlands as a tool to strengthen active participation of indigenous peoples, local communities and other stakeholders in wetland conservation and wise use, particularly in wetland planning and management. (Resolution VIII.19)

<table>
<thead>
<tr>
<th>Description</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
<td></td>
</tr>
</tbody>
</table>

#### 2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

This is the case when wetlands contain archaeological or historic remains.

### Action r6.1.vii.- Consider conducting appropriate joint educational and training activities with regard to the cultural values of wetlands and developing pilot projects for testing on a local, regional and national scale further improvement of the application of and/or integration of the Guiding Principles included in the Annex to Resolution VIII.19 in wetland conservation and wise use. (Resolution VIII.19)

<table>
<thead>
<tr>
<th>Description</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
<td></td>
</tr>
</tbody>
</table>

#### 2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Educational centers in such wetlands as En Afeq relate to the cultural aspects of wetlands as well.
Action r6.1.ix.- Undertake the necessary measures to retrieve, assess and document for current use all ancestral practices of indigenous peoples that are compatible with the environment in the Andean region. (Resolution VIII.39)

1. The ancestral practices of indigenous people in the Andean region that are compatible with environment protection have been retrieved, assessed, and documented

A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8  [Please include additional comments on the implementation of this action.]

Action 6.1.7.- Apply the New guidelines on management planning for Ramsar sites and other wetlands (Resolution VIII.14) in such a way as to ensure the full incorporation of the cultural features of wetlands in their sustainable use.

1.- Cultural values of wetlands have been incorporated into the management planning of Ramsar sites and other wetlands (if available, please include number of sites)

D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer

N° wetlands / Ramsar sites

2.- Implementation progress since COP8  [Please include information on the incorporation of cultural values into management planning, sites involved, and other comments you consider relevant.]

All restoration plans relate to cultural values as well. The management plan for En Afeq places emphasis on cultural values.

OPERATIONAL OBJECTIVE 7. PRIVATE SECTOR INVOLVEMENT

OPERATIONAL OBJECTIVE 7.1. Promote the involvement of the private sector in the conservation and wise use of wetlands

Go to previous Operational Objective  Go to next Operational Objective  - Go to Table of Contents

PLANNING TOOL SECTION

PRIORITY:  C  A = High; B = Medium; C = Low; D = Not relevant; E = No answer

RESOURCING:  C  A = Good; B = Adequate; C = Limiting; D = Severely limiting; E = No answer

TARGETS (text answer):  To encourage the involvement of the private sector in the conservation and wise use of wetlands.

PLANNED ACTIVITIES (text answer):  To encourage private sector funding for wetland restoration.

COP9 REPORT SECTION

Action 7.1.1.- Encourage the private sector to apply the wise use principle (Ramsar Handbooks 1 to 6) in their activities and investments affecting wetlands.

1. The private sector has been encouraged to apply the wise use principle in activities and investments concerning wetlands

C = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8  [Please include additional comments on the implementation of this action.]
Action 7.1.2.- Seek opportunities to involve the private sector, national science academies, universities and other professional, scientific, and technical societies of recognized merit in wetland-related decision-making, through vehicles such as National Ramsar/Wetlands Committees, site or river basin management authorities/committees, and outreach activities.

1. The private sector, academia and specialized institutions have been brought into decision-making related to wetlands

<table>
<thead>
<tr>
<th></th>
<th>Choose an answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Research and academic institutions and professional societies are integral parts of all decision making bodies.

Action 7.1.4.- Establish, where appropriate, national and local private-sector “Friends of Wetlands” forums where companies can seek advice on applying wise use practices in their businesses, and can also identify opportunities for supporting the activities of the Convention.

1. A private-sector “Friends of Wetlands” forum or equivalent mechanism has been established

<table>
<thead>
<tr>
<th></th>
<th>Choose an answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Action 7.1.5.- Review, in cooperation with the private sector, domestic and international trade in wetland-derived plant and animal products, both exports and imports, and as appropriate implement the necessary legal, institutional and administrative measures to ensure that harvesting is sustainable and in accordance with the Convention on International Trade in Endangered Species of Wild Flora and Fauna (CITES).

1. A review of domestic and international trade in wetland-derived plant and animal products has been carried out

<table>
<thead>
<tr>
<th></th>
<th>Choose an answer for each indicator</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

2. Legal, institutional and administrative measures are being implemented to ensure sustainable harvesting of wetland products

<table>
<thead>
<tr>
<th></th>
<th>Choose an answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

3.- Implementation progress since COP8 [Please include additional comments on the measures taken to ensure sustainable harvesting and trade of wetland products.]

Since Israel’s remaining wetlands are usually protected in national parks or nature reserves, harvesting of wetland products is not undertaken. Reviews are undertaken on international trade in animals.

OPERATIONAL OBJECTIVE 8. INCENTIVES

OPERATIONAL OBJECTIVE 8.1. Promote incentive measures that encourage the application of the wise use principle, and the removal of perverse incentives

Go to previous Operational Objective  Go to next Operational Objective  Go to Table of Contents

PLANNING TOOL SECTION

| PRIORITY: | B | A = High; B = Medium; C = Low; D = Not relevant; E = No answer |
| RESOURCING: | C | A = Good; B = Adequate; C = Limiting; D = Severely limiting; E = No answer |
| TARGETS (text answer): | To promote economic means for the wise use of wetlands |
| PLANNED ACTIVITIES (text answer): | To promote research on the economic valuation of wetlands and means of funding the conservation of wetlands |
### Action 8.1.i.-

Continue to review existing, or evolving, policy, legal and institutional frameworks to identify and promote those measures which encourage conservation and wise use of wetlands and to identify and remove measures which discourage conservation and wise use.

**GLOBAL TARGET 2003-2005:** SC/Bureau to have identified at least 50 CPs to have reviewed policy and legal and institutional frameworks and sought to remove measures adversely affecting wetland conservation and wise use.

<table>
<thead>
<tr>
<th>1. A review of positive and perverse incentive measures in relation to the conservation and wise use of wetlands has been completed</th>
<th>D</th>
<th>Choose an answer for each indicator</th>
</tr>
</thead>
<tbody>
<tr>
<td>2. Actions have been taken to promote incentive measures which encourage conservation and wise use of wetlands</td>
<td>D</td>
<td></td>
</tr>
<tr>
<td>3. Actions have been taken to remove perverse incentive measures which discourage conservation and wise use of wetlands</td>
<td>D</td>
<td></td>
</tr>
</tbody>
</table>

**4.- Implementation progress since COP8**

*Please include additional comments on the promotion and implementation of incentive measures and removal of perverse ones.*

Attempts have been made to valuate the true price of water to all consumers and to reduce subsidies to the agricultural sector. A research study on the economic value of open spaces has been prepared, studies and seminars have been conducted on means of raising awareness of the value of open spaces, including rivers.

### Action 8.1.ii.-

When reviewing agricultural policies, identify possible subsidies or incentives that may be having negative impacts, on water resources in general and on wetlands in particular, in the territory of a Contracting Party and/or elsewhere in the world consistent with their other international rights and obligations, and remove or replace them by incentives that would contribute to wetland conservation, ensuring that these activities and support measures should not support agricultural policies that are inconsistent with trade-related agreements. (Resolution VIII.34)

| 1. Agriculture subsidies or incentives having negative impacts on water resources and in wetlands in particular have been identified | B |
| 2. Actions have been taken to remove or replace agriculture subsidies or incentives having negative impacts on water resources and in wetlands in particular | B |

**3.- Implementation progress since COP8**

*Please include additional comments on agriculture subsidies and incentives and their impacts on water resources and wetlands.*

National water policy relates to the removal of agriculture subsidies which have a negative impact on water resources.

### Action 8.1.iii.-

Review programmes of subsidies concerning the use of groundwater in order to guarantee that those programmes do not lead to negative consequences for the conservation of wetlands. (Resolution VIII.40)

| 1. The programmes of subsidies concerning the use of groundwater have been reviewed in relation to the negative consequences that they may have on wetland conservation | B |
| 2. Implementation progress since COP8** | B |

Reviews have been undertaken concerning the use of groundwater for agricultural purposes.
OPERATIONAL OBJECTIVE R9.I. Integrate CEPA processes into all levels of policy development, planning and implementation of the Convention

PLANNING TOOL SECTION

| PRIORITY: | B |
| RESOURCING: | B |
| TARGETS (text answer): | To continue to integrate CEPA processes into policy development and planning. |
| PLANNED ACTIVITIES (text answer): | To promote awareness of wetlands among all stakeholders through the organization of nature and wetland weeks and the dissemination of information via publications and the internet. In 2005, the week will be inaugurated by the President of the State of Israel. These wetland weeks include activities with the participation of the general public, academia, the army, police, the Israel Knesset (parliament) and government ministries. |

COP9 REPORT SECTION

Action r9.i.ii.- Integrate wetland CEPA into all relevant regional (where applicable), national, catchment and local wetland and other appropriate sectoral policies, strategies, plans and programmes, such as those for biodiversity conservation, water management, fisheries, poverty reduction, etc.

1. Wetland CEPA has been incorporated into sectoral policies, strategies, plans and programmes | B |

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Between March 20-27, 2004, Israel celebrated a “Week of Love for Nature, Water and the Environment,” dedicated to raising awareness of water issues, especially as they relate to the rights of nature and humans to water. The week included activities for the general public, schoolchildren, government officials, members of Parliament (Israel Knesset) and members of Israel’s defense forces.

In an effort to demonstrate the commitment of Israel’s public representatives and private citizens to the right of nature to water, a Covenant on Water for Nature was drawn up. By signing the covenant (in Hebrew), which was available for signature on the website of the Nature and Parks Authority, signatories obligate themselves to do all their power to protect and preserve the country’s water for nature and landscape and to prevent their deterioration, for the sake of present and future generations.

During the course of the week, which was organized by the Nature and Parks Authority, Water Commission and Ministry of the Environment, special attention focused on such themes as wetland conservation, education for water conservation, water management policies, nature’s right to water, alternative water sources and sustainable development of water sources. These CEPA activities accelerated the enactment of an amendment to the Water Law on the right of nature to water.

A similar week is planned for April 9-16, 2005. It will involve the participation of all sectors of the society.

---

2 The Operational Objectives and Actions listed here are those adopted by Resolution VIII.31 (Annex 1), which fully incorporate and expand upon the 15 Actions as listed in Ramsar’s Strategic Plan 2003-2008 (Resolution VIII.25).
OPERATIONAL OBJECTIVE 9. COMMUNICATION, EDUCATION AND PUBLIC AWARENESS (CEPA) 3

OPERATIONAL OBJECTIVE R9.II. Demonstrate that CEPA processes are effective in achieving Ramsar's wetland wise use objectives at the global, national and local levels

Go to previous Operational Objective   Go to next Operational Objective   - Go to Table of Contents

PLANNING TOOL SECTION

| PRIORITY: | B | A= High; B= Medium; C= Low; D= Not relevant; E= No answer |
| RESOURCING: | C | A= Good; B= Adequate; C= Limiting; D= Severely limiting; E= No answer |
| TARGETS (text answer): | To demonstrate the effectiveness of CEPA processes in achieving the wise use of wetlands |
| PLANNED ACTIVITIES (text answer): | To continue the organization of public awareness weeks and public education to promote the wise use of wetlands. |

COP9 REPORT SECTION

Action r9.ii.i.- Develop pilot projects to evaluate a range of approaches for applying CEPA in promoting the wise use of wetlands, in particular involving those who make a direct use of wetland resources

1. Pilot projects have been developed to evaluate different approaches for applying CEPA in promoting the wise use of wetlands
   D  Choose an answer
   A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]
   Major campaigns for water conservation in all sectors have been developed during the years of drought.

Action r9.ii.ii.- Review existing CEPA programmes and case studies and document the lessons learned regarding effective approaches from these experiences.

1. A review of existing CEPA programmes has been completed
   D  Choose an answer for each indicator
   A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

2. Lessons learnt in implementing CEPA programmes have been documented
   C

3.- Implementation progress since COP8 [Please include additional comments on implementation of CEPA programmes and information available.]
   Reviews have largely concentrated on the effects of public campaigns designated at water saving and conservation. In addition, the impacts of the “Week of Love for Nature, Water and the Environment” have been reviewed.

3 The Operational Objectives and Actions listed here are those adopted by Resolution VIII.31 (Annex 1), which fully incorporate and expand upon the 15 Actions listed in Ramsar's Strategic Plan 2003-2008 (Resolution VIII.25).
**OPERATIONAL OBJECTIVE 9. COMMUNICATION, EDUCATION AND PUBLIC AWARENESS (CEPA)**

**OPERATIONAL OBJECTIVE R9.III. Provide national leadership, networks and cohesive frameworks to support and catalyse CEPA for the wise use of wetlands**

**PLANNING TOOL SECTION**

| PRIORITY: | B |
| RESOURCING: | B |
| TARGETS (text answer): | To promote frameworks to support and catalyse CEPA for the wise use of wetlands through increased information and awareness. |
| PLANNED ACTIVITIES (text answer): | To continue to invite stakeholders involved in water management and wetland conservation to take part in campaigns and events to raise awareness of wetland conservation and wise use. To include local stakeholders in river administrations and drainage authorities, to conduct public hearings for development programs, and to promote eco-tourism and eco-agriculture in wetland areas. |

**COP9 REPORT SECTION**

**Action r9.iii.i.- Contracting Parties (as requested by Resolution VII.9) are urged as a matter of priority to appoint suitably qualified persons to fulfil the roles of national government and non-government Focal Points for wetland CEPA, and to advise the Ramsar Bureau of the persons fulfilling these roles and their contact details.**

| 1. A National Government Focal Point for wetland CEPA has been appointed | B |
| 2. A National NGO Focal Point for wetland CEPA has been appointed | B |

**3.- Implementation progress since COP8 [Please include information about Government CEPA and NGO CEPA Focal Points].**

A National Government Focal Point for CEPA has been appointed from the Nature and Parks Authority and a National NGO Focal Point has been appointed from the largest environmental NGO in Israel, the Society for the Protection of Nature in Israel.

**Action r9.iii.ii.- Establish a national Wetland CEPA Task Force (if no other mechanisms exist for this purpose), ensuring suitable stakeholder and NGO representation, to undertake a review of needs, skills, expertise and options, and to set priorities for the implementation of this programme of work.**

| 1. A National wetland CEPA Task Force has been established | C |
| 2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.] |

---

4 The Operational Objectives and Actions listed here are those adopted by Resolution VIII.31 (Annex 1), which fully incorporate and expand upon the 15 Actions as listed in Ramsar's Strategic Plan 2003-2008 (Resolution VIII.25).
**Action r9.iii.iii.-** Formulate, drawing upon the Additional Guidance on reviewing and action planning for wetland communication, education and public awareness (CEPA) developed for this purpose, a national (and, where appropriate, sub-national, catchment or local) action plan for wetland CEPA which incorporates the conclusions to emerge from Action r9.iii.ii above, and provide a copy of this to the Ramsar Convention Bureau so that it can be made available to other Parties and interested organizations and individuals. (The Additional Guidance document is available in hard copy from the Bureau and in html at http://ramsar.org/outreach_reviewsactionplansI.htm)

<table>

| 2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

---

Representatives of different ministries and agencies sit together in interministerial committees.

In addition, the Technion – Israel Institute of Technology has a website dedicated to the water sector in Israel. The mission of the Grand Water Research Institute (GWRI) in the Technion is to advance by research and development the science, technology, engineering, and management of water, through inter-disciplinary research and development and dissemination of information, with emphasis on the issues and problems facing Israel's water sector. An important component of the site is a “Who’s Who in the Water Sector” section. Another national dimension of the GWRI is its contacts with the Water Commission, Mekorot National Water Company, and other national agencies, to consider the research needs as perceived by the managers and planners of Israel's water sector and to cooperate in meeting these needs.

**Action r9.iii.vi.-** Collaborate globally and nationally to encourage synergy with the CEPA activities under other international conventions and programmes, including the Convention on Biological Diversity, the United Nations Framework Convention on Climate Change, and the UNESCO Man and the Biosphere Programme.
1. Actions have been taken to encourage synergies on CEPA activities among international conventions and programmes

Choose an answer
A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Since many of these conventions and programs are implemented by the same agencies in Israel, there is synergy between wetland CEPA and CEPA activities under other conventions and programs.

Action r9.iii.vii.- Establish and maintain an on-line searchable listing of expertise in CEPA and of the CEPA Focal Points, one which can be accessed to assist CEPA activities at national and international levels, and promote this service to assist CEPA programmes and activities.

Choose an answer
A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

The Technion – Israel Institute of Technology has a website dedicated to the water sector in Israel. The Blumenstein Family Water Information Center is part of the Grand Water Research Institute. The center is unofficially recognized as Israel’s national water-related information center and is gateway to a variety of local and international databases providing speedy access to water-related information.

An important component of the site is a “Who’s Who in the Water Sector” section.

OPERATIONAL OBJECTIVE 9. COMMUNICATION, EDUCATION AND PUBLIC AWARENESS (CEPA)

OPERATIONAL OBJECTIVE R9.IV. Transfer, exchange and share CEPA information and expertise that promotes and results in the wise use of wetlands

PLANNING TOOL SECTION

PRIORITY: B
A = High; B = Medium; C = Low; D = Not relevant; E = No answer

RESOURCING: C
A = Good; B = Adequate; C = Limiting; D = Severely limiting; E = No answer

TARGETS (text answer): To transfer and share CEPA information to achieve wise use of wetlands

PLANNED ACTIVITIES (text answer): To advance the development of websites targeted at the general public and publish material on the conservation and wise use of wetlands.

COP9 REPORT SECTION

Action r9.iv.iii.- Continue to produce, distribute and share resource materials to support wetland CEPA actions

Choose an answer
A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

1. Materials to support wetland CEPA have been produced and distributed

The Technion – Israel Institute of Technology has a website dedicated to the water sector in Israel. The Blumenstein Family Water Information Center is part of the Grand Water Research Institute. The center is unofficially recognized as Israel’s national water-related information center and is gateway to a variety of local and international databases providing speedy access to water-related information.

An important component of the site is a “Who’s Who in the Water Sector” section.

5 The Operational Objectives and Actions listed here are those adopted by Resolution VIII.31 (Annex 1), which fully incorporate and expand upon the 15 Actions as listed in Ramsar’s Strategic Plan 2003-2008 (Resolution VIII.25).
The Ministry of the Environment and the Nature and Parks Authority publish reports and resource materials in Hebrew.

**Action r9.iv.iv.** Maintain, and seek to expand, the Ramsar global e-mail networks to include Ramsar Administrative Authorities, Ramsar national wetland CEPA Focal Points, CEPA professionals, Ramsar site managers, those facilities dedicated to environmental education and awareness raising, and local stakeholders. Establish and support similar national e-groups and the linking of these with the global network.

<table>
<thead>
<tr>
<th>1. A national email network on wetland CEPA has been established</th>

<th>Choose an answer</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Stakeholders involved in wetland CEPA in Israel communicate by email on issues relating to wetland conservation and use.

**Action r9.iv.v.** Promote and seek to resource the coordination of the Wetland Link International programme of the Wildfowl & Wetland Trust, UK, in order to allow it to assist wetland education centres to create a global network and national centres of excellence for promoting CEPA, and to facilitate information exchange between centres in developed and developing countries and countries with economies in transition.

<table>
<thead>
<tr>

2.- Implementation progress since COP8 [Please include additional information on the centres or facilities that are twinned with similar ones in other countries, and further comments you consider relevant.]
OPERATIONAL OBJECTIVE R9.V. Improve the individual and collective capacity and opportunities of people to participate in and contribute to using wetlands wisely, through the recognition of the values of wetland resources

TARGETS (text answer): To promote public participation in wetland conservation and wise use.

PLANNED ACTIVITIES (text answer): To disseminate information on the values of wetland resources through the internet and publications.

COP9 REPORT SECTION

Action r9.v.i.- Review the current national needs and capacities in the areas of wetland CEPA, including in relation to the establishment and operations of wetland education centres (see Operational Objective r9.viii) and use this to define capacity-building priorities within the national wetland CEPA action plan (see Action r9.iii.iii)

1. A review of needs and capacities in the areas of wetland CEPA has been completed

   | D | Choose an answer
   |---|-------------------
   | A | Not applicable;
   | B | Yes;
   | C | No;
   | D | Partly/in some cases;
   | E | In progress;
   | F | Being planned;
   | G | Being updated;
   | H | Other status (explain below);
   | I | No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Such a review was performed in preparation for the Week of Love for Nature, Water and the Environment which took place in March 2004.

Action r9.v.ii.- In collaboration with Ramsar’s International Organization Partners, identify sources of expert information and training opportunities in wetland CEPA in order to facilitate the sharing of expertise and knowledge at the local, national, regional and global levels.

1. Sources of expert information and training opportunities in wetland CEPA have been identified

   | C | Choose an answer
   |---|-------------------
   | A | Not applicable;
   | B | Yes;
   | C | No;
   | D | Partly/in some cases;
   | E | In progress;
   | F | Being planned;
   | G | Being updated;
   | H | Other status (explain below);
   | I | No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Action r9.v.iii.- Seek resources through appropriate mechanisms to support the capacity building identified as priorities through Action r9.v.i, ensuring that key groups such as women and indigenous and rural communities are not overlooked.

1. Resources for capacity building in wetland CEPA have been sought

   | C | Choose an answer for each indicator
   |---|-----------------------------------
   | A | Not applicable;
   | B | Yes;
   | C | No;
   | D | Partly/in some cases;
   | E | In progress;
   | F | Being planned;
   | G | Being updated;
   | H | Other status (explain below);
   | I | No answer

2. Progress in obtaining resources for capacity building in wetland CEPA has been made

   | C | Choose an answer for each indicator
   |---|-----------------------------------
   | A | Not applicable;
   | B | Yes;
   | C | No;
   | D | Partly/in some cases;
   | E | In progress;
   | F | Being planned;
   | G | Being updated;
   | H | Other status (explain below);
   | I | No answer

6 The Operational Objectives and Actions listed here are those adopted by Resolution VIII.31 (Annex 1), which fully incorporate and expand upon the 15 Actions as listed in Ramsar’s Strategic Plan 2003-2008 (Resolution VIII.25).
3.- Implementation progress since COP8 [Please include additional comments on the activities for resourcing capacity building in wetland CEPA.]

Action r9.v.iv.- Review formal educational curricula to ensure that they are incorporating information on the ecosystem services provided by wetlands, promoting the wise use principle, and recognizing the importance of CEPA in pursuing the objective of wise use.

1. A review of formal educational curricula in relation to wetland services and wise use has been carried out

2. Changes in the formal educational curricula to incorporate wetland-related issues have been effected

Choose an answer for each indicator
A = Not applicable; B = Yes; C = No;
D = Partly/in some cases; E = In progress;
F= Being planned; G = Being updated;
H = Other status (explain below); I = No answer

3.- Implementation progress since COP8 [Please include additional comments on the consideration of wetland services and wise use in the formal educational curricula.]

The educational system has included sustainable development and some elements relating to biodiversity and wetland conservation in the curriculum.

OPERATIONAL OBJECTIVE 9. COMMUNICATION, EDUCATION AND PUBLIC AWARENESS (CEPA) 7

OPERATIONAL OBJECTIVE R9.VI. Foster sustained national campaigns, programmes and projects to raise community awareness of the important ecosystem services provided by wetlands as well as their social, economic and cultural values

COP9 REPORT SECTION

Action r9.vi.i.- Undertake national campaigns, programmes or projects to raise awareness, build community support, and promote stewardship approaches and attitudes towards wetlands.

1. National campaigns, programmes or projects to increase awareness on wetland issues have been launched

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

A “Week of Love for Nature, Water and the Environment” was launched in March 2004 and another is planned for April 2005.

Action r9.vi.ii.- Celebrate World Wetlands Day with appropriate national and local events and promotions and the distribution of resource materials, in order to raise awareness of wetland values and functions

7 The Operational Objectives and Actions listed here are those adopted by Resolution VIII.31 (Annex 1), which fully incorporate and expand upon the 15 Actions as listed in Ramsar’s Strategic Plan 2003-2008 (Resolution VIII.25).
1. World Wetlands Day activities have been carried out

**D** Choose an answer

A = Not applicable; B = Yes; C = No; D = Partially in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional information on the WWD activities that have taken place, if any, at national and local levels.]

World Wetlands Day was celebrated by the publication of a special e-bulletin by the Ministry of the Environment in February 2004. Otherwise, events and campaigns relating to wetlands took place during the “Week of Love for Nature, Water and the Environment.”

**Action r9.vi.iii.**- Collaborate with the media to inform decision-makers and the broader society about the values and benefits of wetlands.

<table>
<thead>
<tr>
<th>1. Collaboration with the media has been systematically used to convey the wetland message</th>
<th><strong>B</strong> Choose an answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>A = Not applicable; B = Yes; C = No; D = Partially in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
<td></td>
</tr>
</tbody>
</table>

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Campaigns and events are covered by both the national and local media.

**Action r9.vi.iv.**- Promote appropriate Wetlands of International Importance as ‘demonstration sites’ for Ramsar’s wise use principle and ensure that they are suitably equipped in terms of capacity, signage, and interpretive materials.

<table>
<thead>
<tr>
<th>1.- Actions have been taken to promote and equip Ramsar site(s) as demonstration sites for the wise use principle (if available, please include number of sites)</th>
<th><strong>B</strong> Choose an answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>A = Not applicable; B = Yes; C = No; D = Partially in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
<td></td>
</tr>
</tbody>
</table>

2.- Implementation progress since COP8 [Please include information on the actions taken, the Ramsar site(s) equipped, and any other additional comments you consider relevant.]

In both Ramsar sites, visitor centers exist. In En Afeq, major emphasis is placed on education and awareness.

---

**OPERATIONAL OBJECTIVE 9. COMMUNICATION, EDUCATION AND PUBLIC AWARENESS (CEPA)**

**OPERATIONAL OBJECTIVE R9.VII.** Support and develop mechanisms to ensure that CEPA processes are incorporated into participatory, multi-stakeholder wetland management

---

**PLANNING TOOL SECTION**

<table>
<thead>
<tr>
<th>PRIORITY:</th>
<th>B</th>
<th>A = High; B = Medium; C = Low; D = Not relevant; E = No answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>RESOURCING:</td>
<td>C</td>
<td>A = Good; B = Adequate; C = Limiting; D = Severely limiting; E = No answer</td>
</tr>
</tbody>
</table>

**TARGETS (text answer):** To develop mechanisms for the incorporation of CEPA processes into participatory wetland management.

**PLANNED ACTIVITIES (text answer):** To incorporate CEPA processes into decision making processes on water resource management.

---

8 The Operational Objectives and Actions listed here are those adopted by Resolution VIII.31 (Annex 1), which fully incorporate and expand upon the 15 Actions as listed in Ramsar’s Strategic Plan 2003-2008 (Resolution VIII.25).
Action r9.vii.iii.- Ensure that multi-stakeholder bodies are in place to guide and inform catchment/river basin and local wetland-related planning and management, and that these bodies include appropriate expertise in CEPA.

1. CEPA expertise has been incorporated into catchment/river basin planning and management tools

---

**Choose an answer**

A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer

---

2. Implementation progress since COP8 (Please include additional comments on the implementation of this action.)

Israel’s river restoration administrations include multi-stakeholder bodies.

Action r9.vii.v.- Where they do not already exist, introduce into site management plans the appropriate strategies and actions for complementary communication, education and public awareness

1. CEPA strategies and actions have been incorporated into the management plans of Ramsar sites (if available, please include number of sites)

---

**Choose an answer**

A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer

---

2. Implementation progress since COP8 (Please include information on the actions taken, the Ramsar site(s) involved, and other additional comments you consider relevant.)

The management plans for both of Israel’s Ramsar sites relate to CEPA strategies and actions.

---

OPERATIONAL OBJECTIVE 9. COMMUNICATION, EDUCATION AND PUBLIC AWARENESS (CEPA)

OPERATIONAL OBJECTIVE R9.VIII. Promote and support the role of wetland and other education centres as focal points for global, national and local CEPA efforts

---

Go to previous Operational Objective Go to next Operational Objective - Go to Table of Contents

PLANNING TOOL SECTION

**PRIORITY:**

B

A = High; B = Medium; C = Low; D = Not relevant; E = No answer

**RESOURCING:**

C

A = Good; B = Adequate; C = Limiting; D = Severely limiting; E = No answer

**TARGETS** (text answer):

To continue to develop educational centers in wetlands.

**PLANNED ACTIVITIES** (text answer):

To promote the educational center in En Afeq as a focal point for national and local CEPA efforts, mainly targeted at children, the general public, scientists and academics.

---

COP9 REPORT SECTION

Action r9.viii.i.- Seek to establish education centres at Ramsar and other wetland sites to provide focal points for local and national CEPA activities.

---

9 The Operational Objectives and Actions listed here are those adopted by Resolution VIII.31 (Annex 1), which fully incorporate and expand upon the 15 Actions as listed in Ramsar’s Strategic Plan 2003-2008 (Resolution VIII.25).
1.- Education centres have been established at Ramsar sites and other wetlands *(if available, please include number of centres and sites)*

<table>
<thead>
<tr>
<th>B</th>
<th>Choose an answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>

<td>A</td>
<td>Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

| Nº facilities |

2.- Implementation progress since COP8 *(Please include information on the facilities involved in national CEPA efforts and activities, and any other additional comments you consider relevant.)*

*These sites often include special guidance activities and visits by schoolchildren.*
OPERATIONAL OBJECTIVE 10. DESIGNATION OF RAMSAR SITES

OPERATIONAL OBJECTIVE 10.1. Apply the Strategic Framework and guidelines for the future development of the List of Wetlands of International Importance (Ramsar Handbook 7)

PLANNING TOOL SECTION

PRIORITY: A

A= High; B= Medium; C= Low; D= Not relevant; E= No answer

RESOURCING: C

A= Good; B= Adequate; C= Limiting; D= Severely limiting; E= No answer

TARGETS (text answer): To advance the declaration of wetland nature reserves which may potentially be included in the Ramsar List.

PLANNED ACTIVITIES (text answer): To promote the declaration of marine nature reserves.

COP9 REPORT SECTION

Action 10.1.1.- Renew efforts to apply the Strategic Framework and guidelines for the future development of the Ramsar List (Resolution VII.11) including, as a matter of priority the establishment of a strategy and priorities for the further designation of Ramsar sites so as to achieve, as soon as possible, the coherent national networks called for in the Vision for the List. (Resolution VIII.10).

GLOBAL TARGET 2003-2005: Report on implementation progress to the Ramsar Bureau by 31 December 2003, with consolidated Bureau report circulated to all Parties by 31 March 2004. Each CP which has not designated a Ramsar site since accession to the Convention to have designated at least one new site. Designation of a further 55 million ha and 250 Ramsar sites, as progress towards global targets of 2500 sites and 250 million ha by 2010.

1. A strategy and priorities have been established for further designation of Ramsar sites, in application of the Strategic Framework for the Ramsar List

Choose an answer

A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Current priorities relate to the declaration of marine nature reserves that may be designated as Ramsar sites.

Action r10.1.1.- Identify all wetlands which potentially qualify for designation as Ramsar sites, as a concrete output of the strategy and priorities called for in Action 10.1.1, establish targets for future designation in terms of number of sites to be designated, and communicate these targets to each meeting of the Conference of the Parties and to the Ramsar Bureau. (Resolution VIII.10)

See action I.1.2

1. All potential Ramsar sites have been identified and targets for future designations have been defined.

Choose an answer

A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Targets relate to marine nature reserves.

Action r10.1.ii.- Use the appropriate 1% thresholds contained in Waterbird Population Estimates 3rd Edition in identifying and designating Wetlands of International Importance under Criterion 6 of the Strategic Framework and guidelines for the future development of the List of Wetlands of International Importance (Resolution VIII.11). (Resolution VIII.38)
1. The appropriate 1% thresholds contained in *Waterbird Population Estimates 3rd Edition* have been used in identifying and designating Ramsar sites under Criterion 6 *(if applicable, please include number of sites designated under Criterion 6)*  

<table>
<thead>
<tr>
<th>B</th>
<th>Choose an answer</th>
<th>Nº Ramsar sites</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
<td></td>
</tr>
</tbody>
</table>

2. Implementation progress since COP8 *(Please include the list of designated sites and any other additional comments on the implementation of this action that you consider relevant.)*

The Hula Valley was designated as an internationally recognized Important Bird Area by BirdLife International in 1994 in recognition, inter alia, of the existence of 17 waterbird species in the Hula, which constitute 1% or more of their Middle East population.

Israel accords special priority to assessments and censuses of waterbird populations. These are carried out annually by professionals and the general public alike. Observation stations also carry out bird counts across the width of northern Israel during the autumn migration. Some 20 stations take part in the bird migration survey, which is conducted by the Israel Ornithological Center, with results published on the website of the Center and the International Center for the Study of Bird Migration – www.birds.org.il.

**Action 10.1.2.** In undertaking Action 10.1.1, give priority attention to the designation sites for each representative, rare or unique wetland types present in the territory of a Contracting Party, as well as to wetland types currently under-represented in the Ramsar List, including, inter alia, karst and other subterranean hydrological systems, coral reefs, mangroves, seagrass beds, salt marshes, tidal flats, peatlands, wet grasslands, temporary pools, arid-zone wetlands and mountain wetlands *(Resolution VIII.12)*, and in so doing apply the guidelines so far approved by the COP to assist in the designation of some of these wetland types *(Resolutions VIII.11 and VIII.33)*, and report on progress to COP9.

**See action 1.1.2**

1. Designation as Ramsar sites of representative, rare or unique wetland types present in the territory has been done *(if applicable, please include number of sites designated).*  

<table>
<thead>
<tr>
<th>D</th>
<th>Choose an answer</th>
<th>Nº Ramsar sites</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
<td></td>
</tr>
</tbody>
</table>

2. Implementation progress since COP8 *(Please include the list of designated sites and any other additional comments on the implementation of this action that you consider relevant.)*

Most of the wetland types which are currently under-represented in the Ramsar List do not exist in Israel.

3. Designation of wetland types currently under-represented in the Ramsar List has been done *(if applicable, please include number of sites designated).*  

<table>
<thead>
<tr>
<th>C</th>
<th>Choose an answer</th>
<th>Nº Ramsar sites</th>
</tr>
</thead>

</tr>
</tbody>
</table>

---

10 In line with Articles 1.1 and 2.1 of the Convention, which include as Ramsar wetlands areas of marine water the depth of which at low tide does not exceed six metres, and indicates that Ramsar sites may “incorporate islands or bodies of marine water deeper than six metres at low tide lying within the wetlands.”
2.- Implementation progress since COP8 [Please include the list of designated sites and other additional comments you consider relevant.]

Efforts are focused on the designation of coastal and marine sites as nature reserves and potentially as Ramsar sites. Since 2002, Israel has participated in a regional SMAP (Short and Medium-Term Priority Environmental Action Programme) project on the development of marine and coastal protected areas in the Mediterranean Region. The project entails the elaboration of management plans for the marine areas of several countries including the Nature Reserve of Rosh Haniqra in Israel.

Action 10.1.4.- In addition to the priority established in 10.1.2, also assign priority to the designation as Ramsar sites of wetlands hosting globally threatened species and species that are unique or endemic to the territory of a Contracting Party or for which the territory supports a significant proportion of the global extent of the species.

Action r10.1.iv.- Collaborate in the identification and designation as Ramsar sites of national and international site networks for migratory species, including migratory waterbirds, as a contribution to other initiatives under related international and regional environmental conventions and programmes, including, inter alia, the Convention on Migratory Species and its Agreements such as the African-Eurasian Waterbirds Agreement (AEWA), and other existing arrangements such as the North American Waterfowl Management Plan, the Western Hemisphere Shorebird Reserve Network, and the Asia-Pacific Migratory Waterbird Conservation Strategy. (Resolution VIII.10)

Action 10.1.5.- Designate, as a priority, those eligible sites that are not under any form of protective or sustainable use management regime, including those utilised for agriculture, as the basis for accelerating the establishment of such regimes, and ensure that this is done soon after designation.
2.- Implementation progress since COP8 [Please include the list of designated sites and other additional comments you consider relevant.]

Israel only designates Ramsar sites that are under some form of protected status so as to have a legal framework for wetland conservation. On the other hand, Israel has identified several areas which are currently unprotected as worthy of declaration as nature reserves and national parks.

**Action 10.1.6.** Consistent with the Guidelines for international cooperation under the Ramsar Convention on Wetlands (Ramsar Handbook 9), designate the national area of transboundary wetlands as a Ramsar site and invite the concerned neighboring country(ies) to do likewise, with a view to establishing a harmonized management regime for the entire wetland.

<table>
<thead>
<tr>
<th>1.- Designation as Ramsar sites of the national area of transboundary wetlands has been done (if applicable, please include number of sites designated).</th>

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

**Action r10.1.xviii.** [The STRP has been asked to] review . . . the ecological roles played by reservoirs and other human-made wetlands, including their use by aquatic and other water-dependent biota, and prepare guidance for Contracting Parties concerning the identification and designation of such wetlands for the Ramsar List, taking into account the experience gained by Parties that have already done so. (Resolution VIII.2)
1. The Party's experience with the ecological roles played by reservoirs and other human-made wetlands, and lessons learned, have been communicated to the STRP for inclusion in its review

C
Choose an answer
A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Although Israel has not communicated its experience to STRP, it continues to accumulate experience on the ecological role played by reservoirs and other artificial wetlands.

Action 10.1.8.- Continue to support the work of Wetlands International and others in the updating for each COP of the 1% thresholds for waterbird populations for the application of Criterion 6 for Ramsar site designation, having first undertaken international scientific consultation on its contents; seek to provide such population information for other wetland-dependent taxa; and apply this information for the designation of Ramsar sites. (Refer also to Operational Objective 12.2.)

1. Contributions have been made to the updating of the 1% thresholds for waterbird populations

B
Choose an answer
A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the contributions made.]

Israel conducts an annual census on waterbirds and provides the results to Wetlands International.

3. Populations information for wetland-dependent taxa other than waterbirds have been provided to Wetlands International

C
Choose an answer
A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

4.- Implementation progress since COP8 [Please include additional comments on the information provided.]

Action r10.1.xxi.- Assist Wetlands International and BirdLife International through the continued collection and supply of population data on waterbirds, including globally threatened species and those species identified by BirdLife International in Threatened Birds of the World as being data deficient. (Resolution VIII.38)

1. Population data on waterbirds is collected regularly

B

2. The population data on waterbirds collected has been regularly provided to Wetlands International

B

3. The population data on waterbirds collected and supplied to WI included information on globally threatened species and species with deficient data

B

4.- Implementation progress since COP8 [Please include additional comments on the information available about population data on waterbirds.]

The Hula Valley was designated an internationally recognized Important Bird Area by BirdLife International in 1994. One of the criteria was the existence of 17 waterbird species where 1% of their Middle Eastern population occurs at the Hula.

For the past 39 years, Israel has taken part in the International Waterfowl Census, which takes place in January each year and monitors waterbirds at wetlands throughout the country. Birdwatchers from the general public join official inspectors in the census and the public is advised of the results of the census. Last year’s census took place on January 17, 2004. Its aim: to estimate the population size of different species of waterfowl, to assess changes in waterfowl populations and species over the years and to undertake the necessary action to preserve endangered species. Some 400 water bodies were visited during last year’s count.

In addition, observation stations of the Israel Ornithological Center carry out bird counts across the width of northern Israel during the autumn migration. The results are published on the website of the Israel
OPERATIONAL OBJECTIVE 10. DESIGNATION OF RAMSAR SITES

OPERATIONAL OBJECTIVE 10.2. Maintain the Ramsar Sites Database and constantly update it with the best available information, and use the database as a tool for guiding the further designation of wetlands for the List of Wetlands of International Importance

PRIORITY: B
RESOURCING: C

TARGETS (text answer):
To maintain and update the Ramsar Sites Database

PLANNED ACTIVITIES (text answer):
To update the Ramsar Sites Database based on current and planned assessments.

COP9 REPORT SECTION

Action 10.2.2.- Ensure that the social and cultural values and features of listed sites are fully recognized in the descriptions of Ramsar sites in the Information Sheet on Ramsar Wetlands, as the basis for their incorporation in site management planning.

1. Special care has been taken to include the social and cultural values and features in the ‘Information Sheets on Ramsar Wetlands’ submitted for inclusion in the Ramsar Database

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Action 10.2.3.- Submit missing or incomplete data sheets and/or maps of listed sites as a matter of utmost urgency, and also ensure that all previously submitted site descriptions are in the format of the approved Information Sheet on Ramsar Wetlands.

1. All missing or incomplete data sheets and/or maps of Ramsar sites have been submitted to the Ramsar Bureau

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Action 10.2.4.- Fully update and submit revised Ramsar Information Sheets as frequently as necessary to record changes in the status of sites, and at least at intervals of not more than six years, so that they can be used for reviewing change in ecological character and progress in achieving the Vision and Objectives of the Strategic Framework and guidelines for the future development of the List of Wetlands of International Importance (Ramsar Handbook 7) at each COP.

1. All required updates of the Information Sheet on Ramsar Wetlands have been submitted to the Ramsar Bureau

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]
2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

OPERATIONAL OBJECTIVE 11. MANAGEMENT PLANNING AND MONITORING OF RAMSAR SITES

OPERATIONAL OBJECTIVE 11.1. Maintain the ecological character of all Ramsar sites

PLANNING TOOL SECTION

| PRIORITY: | A | A= High; B= Medium; C= Low; D= Not relevant; E= No answer |
| RESOURCING: | C | A= Good; B= Adequate; C= Limiting; D= Severely limiting; E= No answer |
| TARGETS (text answer): | To continue to maintain the ecological character of Israel's two Ramsar sites |
| PLANNED ACTIVITIES (text answer): | To assure a suitable supply of water, of the quantity and quality required, to maintain the ecological character of Israel's two Ramsar sites. |

COP9 REPORT SECTION

Action 11.1.1.- Consistent with Article 3.1 of the Convention, define and apply the measures required to maintain the ecological character of each listed site, using as the basis for this the official definitions of “ecological character” and “change in ecological character” adopted by Resolution VII.10 and the integrated package of Convention tools for site management as presented in Ramsar Handbook 8 as well as the supplementary guidance adopted by COP8, and ensure that this information is included in the Information Sheet on Ramsar Wetlands.

1.- The measures required to maintain the ecological character of Ramsar sites have been defined and applied (if available, please include number of sites where measures have been applied). B

| Choose an answer |
| A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer |

2.- Implementation progress since COP8 [Please include the list of sites involved and any additional comments on the implementation of this action that you consider relevant.]

The Hula Nature Reserve is undergoing a major rehabilitation project to maintain its ecological character and a major rehabilitation project for En Afeq is in advanced planning stages.

Action 11.1.2.- Apply the Convention’s New Guidelines for management planning for Ramsar sites and other wetlands (Resolution VIII.14) to develop management plans or strategies for all Ramsar sites.

1. The New Guidelines for management planning have been used in the development of management plans or strategies D

| Choose an answer |
| A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer |

2.- Implementation progress since COP8 [Please include additional comments on the way the guidelines have been used.]

Guidelines for management planning have been incorporated into the management plans for both Ramsar sites.

<th>N° Ramsar sites</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
</tr>
</tbody>
</table>

7.- Implementation progress since COP8 [Please include the list of Ramsar sites whose management plans fall under each category, and any additional comments you consider relevant.]

Both Ramsar sites have management plans in place which are fully applied but these management plans are currently being updated in response to the previous years of drought.

Action r11.1.i.- When reviewing and updating existing management plans, recognize that other management planning processes exist, especially where other designations apply to the same areas that are listed as Ramsar sites, and that these may be valid alternatives for delivering management planning where such approaches adequately and fully implement clearly stated conservation objectives to ensure the conservation and wise use of these wetlands. (Resolution VIII.14)

MANAGEMENT PLANS AT RAMSAR SITES (CONT.)

1.- Ramsar sites in which management plans developed under other processes (e.g., Biosphere Reserves) are being applied

<table>
<thead>
<tr>
<th>N° Ramsar sites</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
</tr>
</tbody>
</table>

2.- Implementation progress since COP8 [Please include the list of Ramsar sites under this category, and any other comments you consider relevant.]

Israel's Ramsar sites are nature reserves whose management plans are formulated by the Nature and Parks Authority.

Action r11.1.ii.- Utilize all the available Ramsar tools and guidance to assist in management planning processes, including inter alia the description and maintenance of ecological character and designing a monitoring programme (Resolution VI.1); the wetland risk assessment and indicators (Resolution VII.10); the guidance on impact assessment (Resolution VIII.9) and on wetland restoration, including identification of sites appropriate for restoration (Resolution VIII.16); and, where appropriate, the Guidelines for Global Action on Peatlands (Resolution VIII.17). (Resolution VIII.14)

1. The full array of Ramsar tools and guidance have been used in the development or updating of management plans for wetland sites

<table>
<thead>
<tr>
<th>D</th>
<th>Choose an answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
<td></td>
</tr>
</tbody>
</table>

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Israel has used those Ramsar tools which are applicable to its Ramsar sites.

Action r11.1.iii.- Take note of the emphasis in the New Guidelines for management planning for Ramsar sites and other wetlands (Resolution VIII.14) on ensuring the involvement of all stakeholders in all stages of the management planning process, and utilize the guidelines adopted by Resolution VII.8 on Establishing and strengthening local communities' and indigenous peoples' participation in the management of wetlands (Ramsar Handbook no. 5) and the Guiding principles for taking into account the cultural values of wetlands for the effective management of sites annexed to Resolution VIII.19 to assist in this process. (Resolution VIII.14)

1. All stakeholders have been fully involved in the management planning processes

<table>
<thead>
<tr>
<th>D</th>
<th>Choose an answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
<td></td>
</tr>
</tbody>
</table>

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Stakeholders largely include the Nature and Parks Authority and the Water Commission, which is responsible for water allocations in Israel.
Action r11.1.iv.- Take into account, when planning the management of Ramsar sites and other wetlands, the wider management implications of activities within river basins and other catchments, which duly acknowledge the need for appropriate implementation of agricultural practices (Resolution VIII.34), applying Resolution VII.18 on Guidelines for integrating wetland conservation and wise use into river basin management (Ramsar Handbook no. 4), and the guidance adopted by COP8 on integrated coastal zone management (Resolution VIII.4) and on the allocation and management of water for maintaining the ecological functions of wetlands (Resolution VIII.1). (Resolution VIII.14)

<table>
<thead>
<tr>
<th>1. The wider management implications (e.g., agricultural practices, river basin management, coastal zone management) have been taken into account in preparing the management plans for Ramsar sites</th>
<th>B</th>

</tr>
</tbody>
</table>

Action r11.1.vii.- Apply waterbird monitoring data, and analyses drawn from them, when appropriate, as a means of providing objective information for site management planning and the evaluation of national or regional wetland policies. (Resolution VIII.38)

<table>
<thead>
<tr>
<th>1. Waterbird data and analysis derived from them have been used in management planning</th>
<th>B</th>
</tr>
</thead>
<tbody>
<tr>
<td>Choose an answer</td>
<td>A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

Management plans take account of wider management implications, which largely relate to water resource management issues, river basin management, agricultural practices and other considerations.

Maintenance of ecological character in the face of inadequate water supply (due to drought) is a priority issue in management plans.

Considerations of climate change have been taken into account in the context of preparing for drought years.

Israel has always taken account of waterbird data and analysis in its management planning both because it is a
major stopover for migratory birds and in order to reduce the conflicts between agriculture near wetlands and waterbirds.

**Action r11.1.x.-** With the support of Contracting Parties and IOPs, the Ramsar Bureau should identify agriculture-related management practices developed for areas that include Ramsar sites, and contribute this information to the preparation of the guidelines as requested in Action r11.1.ix and share this information with the secretariats of CBD and the Convention to Combat Desertification (CCD). (Resolution VIII.34)

1. Assistance has been provided to the Ramsar Bureau in the identification of agriculture-related management practices developed for areas that include Ramsar sites

<table>
<thead>
<tr>

</tbody>
</table>

Nº Ramsar sites 2

4. Implementation progress since COP8 [Please include the list of Ramsar sites with strict protection measures, and any additional comments you may consider relevant.]

Both Ramsar sites in Israel are small and sensitive and strict protection measures have been established for both.

**Action 11.1.5.-** Consider as a matter of priority the establishment of cross-sectoral site management committees for Ramsar sites, involving relevant government agencies, local community representatives, and other stakeholders, including the business sector.
Nº Ramsar sites

1.- Site management committees have been established at Ramsar sites *(if available, please include number of sites)*

B  Choose an answer for each indicator

A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Cross-sectoral site management committees established at Ramsar sites *(if available, please include number of sites)*

B

3.- Implementation progress since COP8 *(Please include the list of Ramsar sites with management committees under each category, and additional comments you consider relevant.)*

Ramsar sites are managed by a management team appointed by the Nature and Parks Authority. On the regional and national levels, a broad forum is responsible for management issues.

Action r11.1.xiv.- Give priority for support to the development of coherent national and international networks of Ramsar sites and their effective management, in recognition of their essential values and functions in combating poverty through the sustainable use of their ecosystems and their role in maintaining the quality and quantity of water, including at the basin scale; and give priority to projects addressing these issues in the future operation of the Small Grants Fund. (Resolution VIII.10)

1. Actions have been taken to develop coherent national and international networks of Ramsar sites and their effective management as a tool for combating poverty

C  Choose an answer

A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 *(Please include additional comments on the implementation of this action.)*

Action 11.1.6.- Continue to give high priority in the Operational Guidelines for the Small Grants Fund to support for management planning at Ramsar sites.

1. Project proposals to support management planning of Ramsar sites have been submitted to the Small Grants Fund

C  Choose an answer

A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 *(Please include additional comments on the implementation of this action.)*

Action r11.1.xv.- Take into account the General guidance for interpreting “urgent national interest” under Article 2.5 of the Convention and considering compensation under Article 4.2 of the Convention (Resolution VIII.20) when invoking the right under Article 2.5 and considering compensation in those cases where the boundaries of sites included in the Ramsar List are restricted or a Ramsar site is deleted from the List. (Resolution VIII.20)

1.- Article 2.5 of the Convention has been invoked to reduce the area of Ramsar sites and/or to delete sites from the List, and Article 4.2 (compensation) has been applied *(if applicable, please include number of sites)*

OPERATIONAL OBJECTIVE 11. MANAGEMENT PLANNING AND MONITORING OF RAMSAR SITES

OPERATIONAL OBJECTIVE 11.2. Monitor the condition of Ramsar sites, notify the Ramsar Bureau without delay of changes affecting Ramsar sites as required by Article 3.2, and apply the Montreux Record and Ramsar Advisory Mission as tools to address problems.

PLANNING TOOL SECTION

PRIORITY: A
A= High; B= Medium; C= Low; D= Not relevant; E= No answer

RESOURCING: C
A= Good; B= Adequate; C= Limiting; D= Severely limiting; E= No answer

TARGETS (text answer): To closely monitor the condition of Ramsar sites.

PLANNED ACTIVITIES (text answer): To continue to monitor Ramsar sites so as to detect any changes in their condition.

COP9 REPORT SECTION

Action 11.2.1.- Establish for each Ramsar site an effective monitoring programme, ideally as part of the site management plan, which is designed to detect and provide early warning of changes in ecological character. In so doing, use the Convention’s framework for designing an effective monitoring programme (Resolution VI.1) and its Wetland Risk Assessment Framework (Resolution VII.10) (Ramsar Handbook 8).

<table>

<td>The Hula and En Afeq Nature Reserves are closely monitored to detect trends in biodiversity loss, climate change and desertification.</td>
</tr>
</tbody>
</table>

3.- Status and trends on the loss of biological diversity, climate change and the process of desertification [Please include a summary of the cited issues and provide reference citation to any relevant publications, reports or analyses.]

During the series of drought years in Israel (1998-2001), information on the impacts of drought on biodiversity was gathered. This information is included in the general databank of the Nature and Parks...
Action 11.2.3.- Ensure that at Ramsar sites where change in ecological character may occur as a result of proposed developments or changes in territorial and/or water use which have potential to affect them, an impact assessment is carried out which considers the full range of environmental, social and economic benefits and functions provided by the wetland, and that the resulting conclusions are communicated to the Ramsar Bureau, in line with Article 3.2 of the Convention, and fully taken into account by the authorities concerned.

See action 2.2.3

1. Proposed developments that may affect the ecological character of Ramsar sites have been subject to EIAs, and the results communicated to the Ramsar Bureau pursuant to Article 3.2

   B

   Choose an answer
   A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Major development plans in Israel are subject to EIAs to ensure that such development does not affect the ecological character of Ramsar sites. The results are in Hebrew and have not been communicated to the Ramsar Bureau.

Action r11.2.iv.- Put in place, as a matter of high priority in fulfillment of 3.2 of the Convention, mechanisms in order to be informed at the earliest possible time, including through reports by national authorities and local and indigenous communities and NGOs, if the ecological character of any wetland included in the Ramsar List has changed, is changing or is likely to change. (Resolution VIII.8)

1. Mechanisms have been established to collect information on changes in ecological character of Ramsar sites in accordance with Article 3.2

   B

   Choose an answer
   A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

The collection of information on changes in the ecological character of Ramsar sites is part of the management plan for the sites.

Action 11.2.4.- In fulfilment of Article 3.2 of the Convention, report to the Ramsar Bureau without delay all actual or likely changes in ecological character on Ramsar sites, and include Ramsar sites “where changes in ecological character have occurred, are occurring or are likely to occur” in the Montreux Record as appropriate.

1.- Changes or likely changes (both positive and negative) in ecological character at Ramsar sites have occurred or may occur (Art. 3.2) (if applicable, please include number of sites)

   B

   Choose an answer for each indicator
   A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Changes or likely changes in ecological character of Ramsar sites have been reported to the Ramsar Bureau pursuant to Article 3.2

   C

3.- Ramsar sites were included in the Montreux Record since COP8 (if applicable, please include number of sites)

   C

   Nº Ramsar sites 2

4.- Implementation progress since COP8 [Please include information on the changes or likely changes in ecological character, and list the sites affected.]

Changes in the ecological character at Ramsar sites may occur as a result of drought conditions, but efforts are focusing on rehabilitation, including steps to assure adequate supply of water to these sites. Israel reported on the impacts of drought in its report to COP 8.

5.- Implementation progress since COP8 [Please include information on the steps followed to include...
**Action r11.2.vi.** - Utilize all appropriate mechanisms to address and resolve as soon as practicable the matters for which a site may have been the subject of a report pursuant to Article 3.2; and once those matters have been resolved, submit a further report, so that both positive influences at sites and changes in ecological character may be fully reflected in reporting under Article 3.2 and in the reporting to all meetings of the COP in order to establish a clear picture of the status and trends of the Ramsar site network at three-year intervals (Resolution VIII.8).

1. Actions have been taken to address the problems that have originated a report to the Ramsar Bureau pursuant to Article 3.2

<table>
<thead>

</tr>
</tbody>
</table>

2.- Implementation progress since COP8 [Please include additional comments on the actions taken.]

Reports to all meetings of COP relate to actions that have been taken to address problems of water scarcity.

**Action 11.2.5.** - For sites included in the Montreux Record, request a Ramsar Advisory Mission of independent experts, where appropriate, to review the problems affecting the site and offer recommendations for remedial actions.

GLOBAL TARGET 2003-2005: For all sites on the Montreux Record, and which have not been subject to a Ramsar Advisory Mission (RAM), CPs to request such a Mission prior to COP9.

<td>Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

1.- Ramsar Advisory Missions have been requested to review the problems at Ramsar sites included in the Montreux Record, if any (if applicable, please include number of sites)

2.- Implementation progress since COP8 [Please include additional comments on the actions taken.]

**Action 11.2.6.** - Where a Ramsar Advisory Mission has been completed for a Montreux Record site, take all necessary steps to implement the recommendations, and report at regular intervals to the Bureau on the results of these actions. At the appropriate time, seek the removal of the site from the Montreux Record, having provided the Bureau and STRP with details of the site condition using the approved questionnaire (Ramsar Handbook 7).

**Action r11.2.viii.** - For sites included in the Montreux Record, regularly provide the Ramsar Bureau with an update on progress on taking action to address the issues for which these Ramsar sites were listed on the Record, including reporting fully on these matters in National Reports to each meeting of the Conference of the Parties (Resolution VIII.8).
### Operational Objective 12. Management of Shared Water Resources, Wetlands and Wetland Species

**Operational Objective 12.1.** Promote inventory and integrated management of shared wetlands and hydrological basins.

#### Planning Tool Section

<table>
<thead>
<tr>
<th>Priority</th>
<th>Resourcing</th>
</tr>
</thead>
<tbody>
<tr>
<td>B</td>
<td>C</td>
</tr>
<tr>
<td>A = High; B = Medium; C = Low; D = Not relevant; E = No answer</td>
<td>A = Good; B = Adequate; C = Limiting; D = Severely limiting; E = No answer</td>
</tr>
</tbody>
</table>

**Targets (text answer):**

To continue to promote inventories and integrated management of shared wetlands and hydrological basins.

**Planned Activities (text answer):**

To continue to identify, characterize and promote integrated management of shared wetlands and hydrological basins.

#### COP9 Report Section

**Action 12.1.1.-** Identify all wetland systems in each Contracting Party shared with other Parties and with non-parties and promote cooperation in their management with the adjoining jurisdiction(s), applying, where appropriate, the Guidelines on integrating wetland conservation and wise use into river basin management (Ramsar Handbook 4, Section A1 of the Guidelines), and the Principles and Guidelines for integrating wetlands into Integrated Coastal Zone Management (ICZM) (Resolution VIII.4).

**Global Target 2003-2005:** All CPs to have identified their transboundary wetlands. 50% of CPs to have identified cooperative management mechanisms.

1. **All transboundary/shared wetland systems have been identified (if applicable, please include number of sites)**

<table>
<thead>
<tr>
<th>Choose an answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>A = Not applicable; B = Yes; C = No;</td>

</tr>
</thead>
<tbody>
<tr>
<td></td>
</tr>
</tbody>
</table>

2. **Implementation progress since COP8** [Please list the transboundary wetlands identified and provide any other additional comments you consider relevant.]

   Transboundary wetlands include the Jordan River Valley area, the Dead Sea and the Gulf of Aqaba. The Hula Valley is part of the Great Rift Valley Migration Flyway.

**Action 12.1.2.-** Pursue cooperation on shared hydrological basins, lake systems and coastal systems through the establishment of bi- or multilateral management commissions. (Section A2 of the Guidelines).

**Global Target 2003-2005:** 50% of CPs with shared basins and coastal systems to be part of joint management commissions or authorities.
1. Cooperative management of shared wetland systems has progressed

D  Choose an answer
A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

In the Gulf of Aqaba, a Red Sea Marine Park project has been promoted and a Memorandum of Understanding on monitoring and data management has been initiated with Jordan.

Israel has initiated activities aimed at recognizing the Great Rift Valley, including the Hula Valley, as a migration flyway which is critical to the preservation of a wide range of globally threatened species and especially hundreds of species of migrating birds. In 2002, expert representatives of the World Heritage Center/UNESCO, IUCN, UNEP, ICOMOS International and the World Bank convened in a special meeting in Israel under the motto, Bridging the Rift. The experts recognized the need to develop a strategy identifying the Great Rift Valley as an outstanding, unique system with significant cultural and natural values on a global scale within the framework of UNESCO and UNEP.

In the Dead Sea, efforts aimed at cooperation with Jordan have been initiated, in part by such groups as the regional NGO, Friends of the Earth Middle East.

Friends of the Earth Middle East has prepared a concept document, entitled “Crossing the Jordan” on rehabilitation of the Jordan River and its environs and organized a seminar, with the participation of Israeli and Jordanian officials, on the subject in March 2005.

Action r12.1.i.- Cooperatively apply the Guidelines for allocation and management of water for maintaining ecological functions of wetlands (Resolution VIII.1) within the context of the management of water allocations in shared hydrological systems, making use of the Ramsar Guidelines for international cooperation under the Convention (Resolution VII.19).

1. The guidelines for allocation and management of water have been applied in the context of shared water systems

D  Choose an answer
A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Within the framework of the peace accord with Jordan, Israel transfers water to Jordan. This has continued even during years of drought in Israel.

Action 12.1.3.- Where appropriate, engage in joint impact assessment processes with neighbouring countries that share wetlands, international river basins, or coastal systems, taking note, where applicable, of the terms of the Espoo Convention on impact assessment in a European transboundary context.

See action 2.2.3

1. Joint impact assessment processes with neighbouring countries have been applied in shared wetland systems

C  Choose an answer
A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Action 12.1.4.- Ensure enhanced accessibility to information, analyses, good practice examples, and experience-sharing on integrating wetlands and biodiversity into integrated river basin management, including through the Ramsar/CBD River Basin Initiative.

1. Actions have been taken to ensure accessibility of information, analysis, good practice examples, etc., on integrating wetlands and biodiversity issues into river basin management

D  Choose an answer
A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Information on river basin management is available in Hebrew on the website of the Ministry of the Environment and some information on river restoration is available as well on the English website of the ministry.

OPERATIONAL OBJECTIVE 12. MANAGEMENT OF SHARED WATER RESOURCES, WETLANDS AND WETLAND SPECIES

OPERATIONAL OBJECTIVE 12.2. Promote cooperative monitoring and management of shared wetland-dependent species

Go to previous Operational Objective  Go to next Operational Objective  - Go to Table of Contents

<th>To promote cooperative monitoring and management of shared water-dependent species in the Gulf of Eilat and Arava Valley, where possible.</th>
</tr>
</thead>
</table>

COP9 REPORT SECTION

Action 12.2.1.- Identify and designate as Ramsar sites all wetlands which satisfy the relevant Ramsar Criteria in relation to wetland-dependent migratory species, giving priority in the first instance to waterbirds, fish, and marine turtles, especially those that are globally threatened. (Section B1 of the Guidelines)

1.- Wetlands which satisfy Criteria in relation to wetland-dependent migratory species have been designated as Ramsar sites (if applicable, please include number of sites designated)

B  Choose an answer
A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

<table>
<thead>
<tr>
<th>Nº Ramsar sites</th>
<th>2</th>
</tr>
</thead>
</table>

3.- Implementation progress since COP8 [Please include information on the designated sites and other additional comments you consider relevant.]

Both the Hula and En Afeq Nature Reserves were designated in recognition of their contribution to waterbirds.

Action 12.2.2.- Continue to promote and support the development of further regional site networks and initiatives for wetland-dependent migratory species, as exemplified by the African-Eurasian Migratory Waterbird Agreement (AEWA), the Asia-Pacific Migratory Waterbird Conservation Strategy, the Western Hemisphere Shorebird Reserve Network, and others. (Sections B2 and B4 of the Guidelines)

See action r10.1.iv

1. New regional site networks and initiatives for wetland-dependent migratory species have been developed

C  Choose an answer
A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer
2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Within the framework of Medwet, Israel expressed interest in advancing the establishment of a regional center for the Asian region which would include Israel, Jordan, Syria and Lebanon, to be established in one of the other countries.

**Action 12.2.5.-** Ensure that national hunting legislation is consistent with the wise use principle for migratory waterbird and other wetland-dependent species, taking into account geographical range, life-history characteristics of species, and research on sustainable harvesting.

1. National hunting legislation is consistent with wise use principle for wetland-dependent species, including waterbirds

<table>
<thead>
<tr>

| TARGETS (text answer): | To promote management of shared water resources. |
| PLANNED ACTIVITIES (text answer): | To promote monitoring and joint management of the Gulf of Eilat, Jordan River system and Dead Sea. |

**COP9 REPORT SECTION**

**Action 12.3.2.-** Encourage development of regional arrangements under the Convention similar to MedWet, where appropriate, applying the Guidance for the development of regional initiatives in the framework of the Convention on Wetlands (Resolution VIII.30) for example in the Black Sea, Caspian Sea, the Caribbean, South America and the Altaj-Sayansky region.

1. Party has been involved in the development of a regional initiative in the framework of the Convention

<table>
<thead>
<tr>
<th>1. Party has been involved in the development of a regional initiative in the framework of the Convention</th>
<th>D</th>
</tr>
</thead>
<tbody>
<tr>
<td>Choose an answer</td>
<td>A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Israel has called for the establishment of a regional group for Asia within the framework of MedWet.

The Arava Institute for Environmental Studies is implementing a joint study with Jordanian partners on biodiversity of flora and fauna in the Southern Arava Rift Valley. The study will help identify the distribution of species and their population trends, with emphasis on the associations between topography, hydrology and human development.

In December 2003, Israel and Jordan signed a Memorandum of Understanding which recognizes the
importance of transboundary coordination and cooperation between the national monitoring programs of the two countries to promote the long term sustainable use and conservation of their shared marine resources.

In 2003-2005, efforts were invested in promoting the recognition of the natural and cultural resources of the Great Rift Valley, and especially its wetlands which serve hundreds of migrating bird species, within the framework of UNESCO and UNEP.

In 2001, Friends of the Earth Middle East, a regional NGO, initiated a regional project entitled “Good Water Neighbors” aimed at raising awareness among Israelis, Palestinians and Jordanians. The project is aimed at fostering people-to-people information exchange, dialog and cooperation on the protection, equitable and sustainable use of water and environment resources. The work on water and environment issues is based on a Partnering Communities Program and focuses on water savings and reuse.

In March 2005, Friends of the Earth Middle East held a Jordan River Symposium aimed at raising awareness of the Jordan River’s shared heritage and the need for its rehabilitation. The conference involved Israeli, Jordanian, Palestinian and international participants.

OPERATIONAL OBJECTIVE 13. COLLABORATION WITH OTHER INSTITUTIONS

OPERATIONAL OBJECTIVE 13.1. Work as partners with international and regional multilateral environmental agreements (MEAs) and other agencies

ACTION 13.1.1.- Continue to strengthen cooperation and synergy with the Convention on Biological Diversity, the Convention to Combat Desertification, the Convention on Migratory Species and its Agreements, the World Heritage Convention, and the United Nations Framework Convention on Climate Change, in particular through the vehicles of Joint Work Plans and collaboration among the respective subsidiary scientific bodies of the conventions and the secretariats, and at national level among the Ramsar Administrative Authorities and Focal Points of the different MEAs.

GLOBAL TARGET 2003-2005: 3rd CBD-Ramsar Joint Work Plan fully implemented. CMS/AEWA Joint Work Plan in place and being implemented. Joint activities developed with UNCCD and UNFCCC, including through participation in the Joint Liaison Group with UNFCCC, CBD and UNCCD.

1. Mechanisms are in place at the national level for collaboration between the Ramsar Administrative Authority and the focal points of other multilateral environmental agreements (MEAs)

2. Implementation progress since COP8 [Please include information on the MEAs involved and additional comments you consider relevant.]

In most cases, national focal points of Ramsar and other MEAs are members of interministerial committees.
Action r13.1.iii.- Make renewed efforts to increase collaboration at the national level between the institutions and focal points responsible for the implementation of MEAs, including through ensuring their participation in National Ramsar Committees, so as to foster synergies and harmonization. (Resolution VIII.5)

See action 18.1.2

1. Amongst other efforts to increase collaboration at the national level between the institutions and focal points responsible for the implementation of MEAs, focal points of other MEAs have been encouraged to participate in the National Ramsar / Wetland Committee

B | Choose an answer
---|---
A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include information on the MEAs whose focal points participate in the Ramsar Committee and additional comments you consider relevant.]

Ramsar focal points and focal points of other biodiversity conventions are members of the interministerial committee for Ramsar.

Action 13.1.2.- Maintain and, where appropriate, seek opportunities to further promote cooperation with UNESCO, in particular its Programme on Man and the Biosphere (MAB), especially as regards wetlands within Biosphere Reserves, and in the area of the development of curricula to integrate wetland issues.

1. Mechanisms are in place for collaboration between the Ramsar Administrative Authority and the National Committees and contacts of UNESCO MAB Programme

B | Choose an answer
---|---
A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional information on the relevant mechanisms.]

The Ramsar Administrative Authority is also responsible for contacts with the UNESCO MAB Programme.

Action 13.1.3.- Give priority to the implementation of the Memoranda of Cooperation or Understanding with the Convention for the Protection and Development of the Marine Environment of the Wider Caribbean Region (Cartagena Convention), the Convention for the Protection and Development of the Marine Environment of the Mediterranean Sea (Barcelona Convention), the Convention on the Protection of the Marine Environment of the Baltic Sea, other regional seas conventions, and the Danube River Protection Convention, and seek to establish similar cooperative arrangements with other regional instruments, such as the Regional Organization for the Protection of the Marine Environment (ROPME).

1. Mechanisms are in place for collaboration between the Ramsar Administrative Authority and the focal points of the applicable regional seas conventions

B | Choose an answer
---|---
A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional information on the relevant mechanisms.]

The Ramsar Administrative Authority is also responsible for the Barcelona Convention for the Protection of the Mediterranean Sea Against Pollution and the Ramsar Focal Point is responsible for the Specially Protected Areas Protocol of the Barcelona Convention.

Action 13.1.5.- Develop closer working relationships with appropriate regional bodies or programmes which have an interest in wetland conservation and wise use, including the Alliance of Small Island States (AOSIS), the Association of South East Asian Nations (ASEAN), the European Union (EU), the Council of Europe, the Southern African Development Community (SADC), the African Union (AU), and the Organization of American States (OAS).
1. Mechanisms are in place for collaboration between the Ramsar Administrative Authority and regional bodies or programmes which have interest in wetland conservation and wise use

- **D** Choose an answer
  - A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

2. Implementation progress since COP8 [Please include additional information on the mechanisms in place.]

In December 2004, an Action Plan for Israel was approved which will upgrade Israel-European Union Cooperation on a wide variety of subjects, within the framework of the European Neighbourhood Policy (ENP). Within the cooperative agreement, several elements relate to cooperation on prevention of water pollution, water uses and biodiversity.

**Action 13.1.6.-** Support and contribute to the development and implementation of the Plan of Action to Implement Africa’s Wetland Management Strategy under the Environmental Initiative of NEPAD, the New Partnership for Africa’s Development.

GLOBAL TARGET 2003-2005: NEPAD’s Action Plan to have fully incorporated Ramsar issues and mechanisms, and being implemented by relevant CPs, in lines with WSSD targets.

1. The Party has participated in the implementation of the wetland programme under NEPAD

- **C** Choose an answer
  - A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

2. Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

**Action 13.1.7.-** Continue to contribute, through the application of Ramsar tools and mechanisms, to the implementation of the Barbados Programme of Action for the Sustainable Development of Small Island Developing States.

GLOBAL TARGET 2003-2005: Review of Ramsar’s contribution to the Barbados Programme of Action, as a contribution to the WSSD target.

1. The Party has participated in wetland-related activities within the Barbados Programme of Action for the Sustainable Development of Small Island Developing States

- **C** Choose an answer
  - A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

2. Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

**Action 13.1.8.-** Continue the development and implementation of joint work plans under the Memorandum of Cooperation between the Ramsar Convention and the South Pacific Regional Environment Program (SPREP)

1. The Party has participated in the implementation of the Ramsar/SPREP Joint Work Plan

- **C** Choose an answer
  - A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

2. Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

**Action r13.1.vi.-** Make use, as appropriate, of the UNEP Guidelines on Enhancing Compliance with multilateral environmental agreements and on National Enforcement, and International Cooperation in Combating Violations, of Laws Implementing Multilateral Environmental Agreements in enhancing and supporting compliance with multilateral environmental agreements, including the Ramsar Convention. (Resolution VIII.24)
1. The Party has made use of the UNEP guidelines in relation to Ramsar

<table>
<thead>

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

OPERATIONAL OBJECTIVE 14. SHARING OF EXPERTISE AND INFORMATION

OPERATIONAL OBJECTIVE 14.1. Promote the sharing of expertise and information

PLANNING TOOL SECTION

PRIORITY: B  
A= High; B= Medium; C= Low; D= Not relevant; E= No answer

RESOURCING: C  
A= Good; B= Adequate; C= Limiting; D= Severely limiting; E= No answer

TARGETS (text answer): To promote the sharing of expertise and information.

PLANNED ACTIVITIES (text answer): To promote the development of websites on Israel’s experience in water management, wetland conservation and conservation of wetland species, especially waterbirds.

COP9 REPORT SECTION

Action 14.1.1.- Using mechanisms such as the national focal points for communication, education and public awareness (CEPA) and for the STRP, promote the sharing of knowledge (traditional, indigenous, and more recently derived technologies and methods) at the global, regional, and national levels. (Section D1 of the Guidelines.)

1. Actions have been taken to share knowledge at the global and/or regional and/or national level

<table>
<thead>
<tr>
<th>Choose an answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

The Israel Ministry of the Environment has upgraded its English website – www.environment.gov.il/english. This website includes information on river and wetland conservation, water management, as well as a special e-bulletin on wetlands which was published in February 2004 in recognition of World Wetlands Day.

Information on nature reserves and national parks which include wetlands is available on the website of the Nature and Parks Authority – www.parks.org.il/ParksENG.

Additional information may be found on the Israel Open Spaces website - http://www.ios.org.il/site/english.asp.

Action 14.1.2.- Recognize training as an important element of international cooperation under the Convention and provide access to such training, especially for wetland managers, and wetland educators and those others responsible for implementing the Convention, from other countries that would benefit from these opportunities. (Sections D2 and D3 of the Guidelines.)

1. The Party has engaged in international cooperation activities related to training on wetland issues

<table>
<thead>
<tr>
<th>Choose an answer</th>
</tr>

</tr>
</tbody>
</table>

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]
### Action 14.1.3.- Develop twinning and/or networks of transboundary wetlands and wetlands sharing common features, as an important mechanism for sharing knowledge and providing training opportunities.

**GLOBAL TARGET 2003-2005:** At least 75 twinning arrangements to be in place and reported to the Bureau for Web publicity on the Ramsar Web site.

| 1.- Networks among wetlands sharing common features have been established for knowledge sharing and training | D | Choose an answer  
|---|---|---
| A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer |

| 2.- Implementation progress since COP8 | **Please include information on the wetland networks established and other comments you consider relevant.** |

Such networks were established within the framework of the Red Sea Marine Peace Park project and will be continued within the framework of the Memorandum of Understanding between Israel and Jordan on monitoring and management of the Gulf of Aqaba.

Within the context of research and conservation of migrating bird species, a website on Migrating Birds Know No Boundaries, [www.birds.org.il](http://www.birds.org.il), provides information on bird migration, with real-time information on birds fitted with satellite transmitters. An educational program, based on this website and field trips, has been developed for Israeli, Palestinian and Jordanian schoolchildren.

| 3.- Twinning arrangements among wetlands sharing common features have been established for knowledge sharing and training (if applicable, please include number of sites involved) | C | Choose an answer  
|---|---|---
| A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer |

| Nº wetlands / Ramsar sites |

| 4.- Implementation progress since COP8 | **Please include information on the twinning arrangement, the sites involved and other comments you consider relevant.** |

### Action 14.1.4.- Further review and develop Internet-based resource kits and knowledge and information sharing, including the Convention’s Wetland Expert Database, on topics including impact assessment, incentives, management planning, river basin management, participation, education and public awareness, and Ramsar sites.

| 1. Internet-based resource kits for knowledge and information sharing on wetland issues have been developed | B | Choose an answer

OPERATIONAL OBJECTIVE 15. FINANCING THE CONSERVATION AND WISE USE OF WETLANDS

OPERATIONAL OBJECTIVE 15.1. Promote international assistance to support the conservation and wise use of wetlands

PLANNING TOOL SECTION

PRIORITY: D  
A= High; B= Medium; C= Low; D= Not relevant; E= No answer

RESOURCING: E  
A= Good; B= Adequate; C= Limiting; D= Severely limiting; E= No answer

TARGETS (text answer): Israel has not been able to promote financial assistance to other Parities.

PLANNED ACTIVITIES (text answer):

COP9 REPORT SECTION

Action 15.1.1.- Mobilize direct funding support from multilateral and bilateral development assistance agencies in order to assist developing countries and countries whose economies are in transition in the conservation and wise use of wetlands and in implementation of the present Strategic Plan. (Based on Section E1 of the Guidelines).

GLOBAL TARGET 2003-2005: Each CP with a bilateral donor agency to have encouraged it to give priority for funding for wetland conservation and wise use projects in relation to poverty alleviation and other WSSD targets and priorities.

1. (For CPs with development assistance agencies) Funding support has been mobilized from development assistance agency for wetland issues  

2. Other forms of funding support have been mobilized for wetland issues  

3.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Action r15.1.1.- Encourage bilateral and multilateral donors to assign priority to supporting wetland inventories in developing countries and countries whose economies are in transition in recognition of the importance of inventory as the basis for developing and implementing sustainable use of wetlands. (Resolution VIII.6)

1. The Party has worked with bilateral and multilateral donors to mobilize funding support for wetland inventories  

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Action 15.1.2.- Mobilize resources to support the implementation of management plans for Ramsar sites in developing countries and countries whose economies are in transition. (Refer also to Operational Objective 11.1)
1.- The Party has worked with donors to mobilize resources for implementation of Ramsar site management plans (if applicable, please include number of sites)

<table>

</tbody>
</table>

2.- Implementation progress since COP8 [Please list the sites involved and include additional comments on the implementation of this action.]

---

**Action r15.1.ii.-** Encourage Contracting Parties and donor organizations to give priority for support to the development of coherent national and international networks of Ramsar sites and their effective management, in recognition of their essential values and functions in combating poverty through the sustainable use of their ecosystems and their role in maintaining the quality and quantity of water, including at the basin scale. Resolution VIII.10) (Refer also to Operational Objective 11.1)

1. The Party has worked with donors to mobilize support for the establishment of coherent national and international networks of Ramsar sites and their effective management

<table>
<thead>
<tr>
<th>A</th>
<th>Choose an answer</th>

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

---

**Action r15.1.iv.-** Continue support, and, as appropriate, increase this support, for wetland-related projects in the Oceania region and extend it to include capacity building activities. (Resolution VIII.42)

1. Financial support provided for wetland-related projects in the Oceania region

<table>
<thead>
<tr>
<th>A</th>
<th>Choose an answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

---

**Action 15.1.3.-** For those Parties with bilateral development assistance agencies, respond to sections E1, E2, E5, E7, E10, E11, E14 and E15 of the Guidelines for international cooperation under the Ramsar Convention on Wetlands (Ramsar Handbook 9), and especially consider issues such as long-term fund generation mechanisms, appropriate monitoring of projects, training of development assistance agency staff, priority for institutional capacity building, the need for cooperation between development assistance agencies, and the importance of coordination between bilateral development assistance agencies and the Ramsar Administrative Authorities in the donor and recipient countries.
(For CPs with development assistance agencies)

1. Work has been done with the development assistance agency in relation to Ramsar’s Guidelines for international cooperation (Res. VII.19)

<table>
<thead>
<tr>
<th>A</th>
<th>Choose an answer</th>

</tr>
</tbody>
</table>

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Action 15.1.4.- Pursuant to 15.1.3, urge all Parties with bilateral development assistance agencies to report on their performance with regard to wetland-related activities at each COP. (Based on Section E5 of the Guidelines)

(For CPs with development assistance agencies)

1. The performance of the development assistance agency in relation to wetland issues has been assessed

<table>
<thead>
<tr>
<th>A</th>
<th>Choose an answer</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Action 15.1.5.- For those Parties involved in the priority-setting for, and the determining of, the modus operandi of the multilateral development and environment-related assistance agencies, seek to ensure that wetland conservation and wise use is afforded due attention and priority.

GLOBAL TARGET 2003-2005: Relevant CPs to report to COP9 on ensuring that multilateral donor agencies afford priority to wetlands within poverty alleviation schemes.

1. The Party has worked with multilateral agencies to ensure that wetland issues receive due attention

<table>
<thead>
<tr>
<th>A</th>
<th>Choose an answer</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Action 15.1.6.- Provide financial support, preferably on a medium and/or long-term basis, to the operations of the Ramsar Small Grants Fund and its Endowment Fund, and the Voluntary Fund for the Convention’s Communication, Education and Public Awareness Programme, seeking to have available a minimum of one million US dollars annually for the former and half a million US dollars for the latter. (Based on Sections E4 and E9 of the Guidelines.)

See action 16.1.2

1. Financial support provided to the Ramsar Small Grants Fund

<table>
<thead>
<tr>
<th>A</th>

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

OPERATIONAL OBJECTIVE 15. FINANCING THE CONSERVATION AND WISE USE OF WETLANDS

OPERATIONAL OBJECTIVE 15.2. Ensure that environmental safeguards and assessments are an integral component of all development projects that affect wetlands, including foreign and domestic investments

PLANNING TOOL SECTION

PRIORITY:  B  
A = High; B = Medium; C = Low; D = Not relevant; E = No answer

RESOURCING:  C  
A = Good; B = Adequate; C = Limiting; D = Severely limiting; E = No answer

TARGETS (text answer): 
To advance environmental assessment of development projects that affect wetlands.

PLANNED ACTIVITIES (text answer): 
To continue to protect wetlands from adverse impacts which may potentially result from development plans in their vicinity.

COP9 REPORT SECTION

Action 15.2.1.- Work with international development agencies, including banks, financial institutions and private investors and developers, to ensure that proposed grants, loans, and development projects include environmental safeguards and environmental assessments of possible impacts upon wetlands. (Based on Section G1 of the Guidelines.)

1. Actions have been taken to work with investors on possible impacts of their projects on wetlands  
A  
Choose an answer  
A = Not applicable; B = Yes; C = No; D = Partly in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Action 15.2.3.- Review wetland-related project development approval and consider the introduction of mechanisms to direct resources derived from these activities back to hands-on wetland management in the country. (Based on Section G3 of the Guidelines.)

1. Work has been done to introduce mechanisms to direct resources derived from wetlands back to wetland management  
A  
Choose an answer  
A = Not applicable; B = Yes; C = No; D = Partly in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]
OPERATIONAL OBJECTIVE 16. FINANCING OF THE CONVENTION

OPERATIONAL OBJECTIVE 16.1. Provide the financial resources required for the Convention’s governance mechanisms and programmes to achieve the expectations of the Conference of the Contracting Parties

Go to previous Operational Objective  Go to next Operational Objective  - Go to Table of Contents

PLANNING TOOL SECTION

| PRIORITY: | B | A = High; B = Medium; C = Low; D = Not relevant; E = No answer |
| RESOURCING: | C | A = Good; B = Adequate; C = Limiting; D = Severely limiting; E = No answer |
| TARGETS (text answer): | To pay Ramsar dues in full and on time. |
| PLANNED ACTIVITIES (text answer): | To pay Ramsar dues in full and on time. |

COP9 REPORT SECTION

Action 16.1.1.- Pay annual contributions to the Convention’s core budget in full and promptly at the beginning of each calendar year.

| 1. Ramsar dues have been paid in full and in a timely manner | B | Choose an answer |
| 2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.] |

Action 16.1.2.- Consider providing additional voluntary contributions to the Convention to support the Small Grants Fund and its Endowment Fund, the Voluntary Fund for the Convention’s Communication, Education and Public Awareness Programme, and the Training Service, regionally-based initiatives such as MedWet, the undertaking of Ramsar Advisory Missions for sites included in the Montreux Record and other Ramsar sites, and other priority activities as determined by the Strategic Plan.

In addition to any contributions listed under Action 15.1.6 above, voluntary contributions have been made:

| 1. to the Ramsar Training Service managed by Wetlands International | C | Choose an answer for each indicator |
| 2. to support regional initiatives under the Convention | C |
| 3. for Ramsar Advisory Missions related to Ramsar sites in the Montreux Record | C |
| 4. towards the development and maintenance of logistics of the San José Record | C |
| 5. to support the work of the Scientific and Technical Review Panel (STRP) | C |
| 6. to expand the internship programme at the Ramsar Bureau | C |
| 7. in relation to COP9 | C |

8.- Implementation progress since COP8 [Please include additional comments on the contributions made to support the services indicated above.]
OPERATIONAL OBJECTIVE 17. INSTITUTIONAL MECHANISMS OF THE
CONVENTION

OPERATIONAL OBJECTIVE 17.1. Ensure that the Conference of the Contracting Parties,
Standing Committee, Scientific and Technical Review Panel, and Ramsar Bureau are operating
at a high level of efficiency and effectiveness to support implementation of this Strategic Plan.

PLANNING TOOL SECTION

<table>
<thead>
<tr>
<th>PRIORITY:</th>
<th>B</th>
</tr>
</thead>
<tbody>
<tr>
<td>RESOURCING:</td>
<td>C</td>
</tr>
<tr>
<td>TARGETS (text answer):</td>
<td>To remain informed about the work of the STRP and to provide feedback when required.</td>
</tr>
<tr>
<td>PLANNED ACTIVITIES (text answer):</td>
<td>To become further involved in the activities of the STRP through the National Focal Point.</td>
</tr>
</tbody>
</table>

COP9 REPORT SECTION

**Action 17.1.6.-** Ensure that each Contracting Party has nominated a national focal point for the work of the STRP (as called for by Resolutions VII.2 and VIII.28) and two focal points (one government, one non-government) for the Communication, Education and Public Awareness Programme (as called for by Resolutions VII.9 and VIII.31).

See also Action r9.iii.i. concerning CEPA national focal points.

1. The National Focal Point for the work of STRP has been nominated

<table>
<thead>
<tr>
<th>Choose an answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

2. Implementation progress since COP8 [Please include information on the STRP National Focal Point and other comments you consider relevant.]

OPERATIONAL OBJECTIVE 18. INSTITUTIONAL CAPACITY OF CONTRACTING PARTIES

OPERATIONAL OBJECTIVE 18.1. Develop the capacity within, and promote cooperation among, institutions in Contracting Parties to achieve conservation and wise use of wetlands.

PLANNING TOOL SECTION

<table>
<thead>
<tr>
<th>PRIORITY:</th>
<th>A</th>
</tr>
</thead>
<tbody>
<tr>
<td>RESOURCING:</td>
<td>C</td>
</tr>
<tr>
<td>TARGETS (text answer):</td>
<td>To increase cooperation between national institutions to promote wetland conservation and wise use.</td>
</tr>
<tr>
<td>PLANNED ACTIVITIES (text answer):</td>
<td>To promote cooperation between institutions dealing with water management issues and water allocation and wetland conservation bodies.</td>
</tr>
</tbody>
</table>
**COP9 REPORT SECTION**

**Action 18.1.1.-** Encourage the review of existing national institutions responsible for the conservation and wise use of wetlands, and on the basis of such a review, identify and implement measures to:

a) increase cooperation and synergy among institutions with direct or indirect responsibility for wetland issues, especially those responsible for the management of water resources and for biodiversity and wetland conservation and management;

b) promote enhanced cooperation, and where appropriate integrated approaches, among the national focal points of environment-related conventions, and consider establishing a coordinating committee to ensure that integrated approaches are taken;

c) promote enhanced contact, and where appropriate close coordination, between the Ramsar Administrative Authority and national professional, technical, scientific and educational societies and agencies involved in wetland conservation or management, including those involved in social and cultural heritage issues; and

**d) provide appropriately trained staff, in adequate numbers, to enable these institutions to implement the Convention to full effect.**

1. **A review of national institutions responsible for the conservation and wise use of wetlands has been completed**
   - **Choose an answer**
     - A = Not applicable; B = Yes; C = No; D = Partly/in some cases;
     - E = In progress; F= Being planned; G = Being updated;
     - H = Other status (explain below); I = No answer

2. **Implementation progress since COP8 [Please include information on the review and other comments you consider relevant.]**
   - Israel has identified those national institutions which are responsible for the conservation and wise use of wetlands.
   - See action 13.1.1

3. **A coordinating committee among focal points of environment-related conventions is in place**
   - **Choose an answer**
     - A = Not applicable; B = Yes; C = No; D = Partly/in some cases;
     - E = In progress; F= Being planned; G = Being updated;
     - H = Other status (explain below); I = No answer

4. **Implementation progress since COP8 [Please include information on the coordinating committee and other comments you consider relevant.]**
   - Interministerial committees on environment-related conventions exist on specific topics including biodiversity and wetlands. The Ministry of the Environment participates in interministerial committees on all of the country’s environment-related conventions.

5. **Mechanisms are in place to ensure cooperation between the Ramsar Administrative Authority and other national institutions directly or indirectly responsible for wetland issues, in particular water and biodiversity**
   - **Choose an answer for each indicator**
     - A = Not applicable; B = Yes;
     - C = No;
     - D = Partly/in some cases;
     - E = In progress;
     - F= Being planned;
     - G = Being updated;
     - H = Other status (explain below); I = No answer

6. **Mechanisms are in place to ensure cooperation between the Ramsar Administrative Authority and relevant professional, scientific or educational societies and agencies involved in wetland conservation or management, including social and cultural heritage issues**
   - **Choose an answer**
     - A = Not applicable; B = Yes;

7. **Implementation progress since COP8 [Please include information on the relevant cooperation mechanisms and any other comments you consider relevant.]**

**Action 18.1.1.-** Build and strengthen institutional capacity and synergies between related instruments at the national level in order to address the linkages between climate change and wetlands and report to COP9 on progress on this matter, including achievements and the identification of difficulties encountered (Resolution VIII.3)
1. Work has been done to address the linkages between climate change and wetlands

**Choose an answer**

- A = Not applicable
- B = Yes
- C = No
- D = Partly/in some cases
- E = In progress
- F = Being planned
- G = Being updated
- H = Other status (explain below)
- I = No answer

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Within the framework of Israel’s National Report on Climate Change (2000), information was gathered on the environmental impacts of climate change, including impacts on wetlands and biodiversity.

### Action 18.1.2.- Establish National Ramsar/Wetlands Committees to provide the opportunity for input from, and representation of, relevant government agencies, including national water management ministries and/or agencies, where appropriate, and non-governmental organizations, STRP and CEPA National Focal Points, key stakeholders, indigenous people and local communities, the private sector and interest groups, and land use planning and management authorities (Recommendation 5.13). When in place, ensure the proper functioning of these Committees.

#### See actions r3.4.iii, r13.1.iii

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. A National Ramsar / Wetlands Committee (or equivalent body) is in place</td>
<td>B</td>
</tr>
<tr>
<td>2. If a Ramsar Committee exists, it is cross-sectoral (relevant ministries and agencies, NGOs, key stakeholders, local communities, private sector, etc.)</td>
<td>D</td>
</tr>
</tbody>
</table>

3.- Implementation progress since COP8 [Please include additional comments on the National Ramsar Committee].

Israel has an interministerial committee on Ramsar in place. It includes representatives of relevant government ministries including Foreign Affairs, Infrastructures, Agriculture, Environment, Justice and the Nature and Parks Authority.

### Action 18.1.3.- Review the designated Ramsar national Administrative Authority (and provincial (sub-national) focal points where appropriate) and STRP and CEPA national focal points in each Contracting Party, with a view to ensuring that these positions are being effective in increasing involvement in the work of the Convention of all relevant agencies and organizations concerned with the conservation and wise use of wetlands.

#### Choose an answer for each indicator

- A = Not applicable
- B = Yes
- C = No
- D = Partly/in some cases
- E = In progress
- F = Being planned
- G = Being updated
- H = Other status (explain below)
- I = No answer

1. The institutional capacity for the effective implementation of the Convention – including the Ramsar Administrative Authority, National Wetland Committee (or equivalent body) and STRP and CEPA focal points– has been assessed

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

### Action 18.1.4.- Assist in achieving a cohesive and coordinated national effort towards the implementation of the Convention, using Ramsar’s national planning tool (based on the National Report Format) as an ongoing planning and monitoring mechanism. Ideally, this tool should be used by all relevant government departments/agencies and include input from National Ramsar/Wetland Committee members and other stakeholders as appropriate.

#### Choose an answer

- A = Not applicable
- B = Yes
- C = No
- D = Partly/in some cases
- E = In progress
- F = Being planned
- G = Being updated
- H = Other status (explain below)
- I = No answer

1. The National Report Format has been used as a national planning tool for the implementation of the Convention

2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]
OPERATIONAL OBJECTIVE 20. TRAINING

OPERATIONAL OBJECTIVE 20.1. Identify the training needs of institutions and individuals concerned with the conservation and wise use of wetlands, particularly in developing countries and countries in transition, and implement appropriate responses

PLANNING TOOL SECTION

| PRIORITY: | B |
| RESOURCING: | C |
| TARGETS (text answer): | To increase training of institutions and individuals concerned with the conservation and wise use of wetlands. |
| PLANNED ACTIVITIES (text answer): | To advance additional seminars and training days for institutions and individuals concerned with the conservation and wise use of wetlands. |

COP9 REPORT SECTION

Action 20.1.1.- Implement, and further develop and publicize, the Convention’s Wetland Training Service.

1. The Party has participated in the development and use of the Ramsar Training Service managed by Wetlands International

2. Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Action 20.1.2.- Identify at national, provincial, and local levels the needs and target audiences for training in implementation of the Convention and, in particular, use of the Wise Use Guidelines and Ramsar Handbooks.

GLOBAL TARGET 2003-2005: At least half of CPs to have assessed national and local training needs.

1. An assessment has been completed of national and local training needs in the implementation of the Convention and use of the Wise Use Handbooks

2. Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

Action 20.1.3.- Identify and disseminate, nationally, regionally and globally, information describing the current training opportunities in disciplines essential for the conservation and wise use of wetlands through the further development of the Bureau’s Ramsar Wise Use Resource Centre (http://ramsar.org/wurc_index.htm) and the Directory of Wetland Management Training Opportunities (http://ramsar.org/wurc_training_directory.htm).

1. The wetland-related training opportunities that exist in the country have been identified

2. Implementation progress since COP8 [Please include additional comments on the implementation of this action.]
### Action 20.1.5.- Assemble and make available, or develop, new training activities and general training modules as necessary, for the use of the Ramsar Handbooks, with specialized modules including coverage of the following fields:

- a) wetland inventory, assessment and monitoring;
- b) national wetland policies and plans;
- c) integrated catchment/river basin and coastal zone planning and management;
- d) integrated site management planning at the local, provincial or catchment/river basin level;
- e) wetland restoration and rehabilitation;
- f) invasive alien species;
- g) agricultural impacts on wetlands and water resources;
- h) impact assessment and strategic environmental assessment;
- i) impacts of climate change, and adaptive management and mitigation of such impacts
- j) economic valuation of wetlands;
- k) communication, education and public awareness techniques.

#### 1. Training modules and materials on wetland-related issues have been developed

<table>
<thead>
<tr>
<th>Choose an answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

### Action 20.1.6.- Provide opportunities for manager training by:

- a) encouraging personnel exchanges for on-the-job training, possibly between twinned sites;
- b) holding pilot training courses at specific Ramsar sites;
- c) siting wetland manager and wetland educator training facilities at Ramsar sites;
- d) obtaining and disseminating information about training courses for wetland managers around the world;
- e) establishing further regional training initiatives such as the Wetlands for the Future Initiative funded by the Government of the USA for the countries of Latin America and the Caribbean.

#### 1. Opportunities for manager training in the country have been provided

<table>
<thead>
<tr>
<th>Choose an answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>

### Action 20.1.7.- Continue to encourage the development of projects for submission to the Small Grants Fund for support for training activities.

#### 1. Training-related projects have been submitted to the Small Grants Fund

<table>
<thead>
<tr>
<th>Choose an answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F = Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
</tr>
</tbody>
</table>
Action 20.1.8.- Encourage further development and use of regional wetland training and research centres, including a Regional Ramsar Centre for Training and Research on Wetlands in the Western Hemisphere (Resolution VII.26) and a Regional Ramsar Centre for Training and Research on Wetlands in Western and Central Asia (Resolution VIII.41).

1.- Support has been provided to the development of regional wetland training and research centres (if applicable, please include number of centres)

<table>
<thead>
<tr>
<th>C</th>
<th>Choose an answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>A = Not applicable; B = Yes; C = No; D = Partly/in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer</td>
<td></td>
</tr>
<tr>
<td>Nº centres</td>
<td></td>
</tr>
</tbody>
</table>

2.- Implementation progress since COP8 [Please include the list of centres and other additional comments you consider relevant.]

Action 20.1.9.- Exchange information, technical assistance and advice, and expertise about training for the conservation and wise use of wetlands through the Communication, Education and Public Awareness Programme, the Bureau, MedWet and the IOPs of the Convention.

1. The Party has participated in exchanges of information and expertise related to wetland training issues

<table>
<thead>
<tr>
<th>C</th>
<th>Choose an answer</th>
</tr>

TARGETS (text answer): Israel does not have the ability to promote this target.

PLANNED ACTIVITIES (text answer):

COP9 REPORT SECTION

Action 21.1.1.- Recruit new Contracting Parties through:

a) seeking direct contact with non-Contracting Parties to provide information on the benefits of membership and advice or assistance in overcoming obstacles;

b) intensifying contacts with the diplomatic representatives of non-Contracting Parties;

c) seeking assistance from the secretariats of other conventions, including the Regional Seas Conventions, and

in-country offices of the United Nations Development Programme, the World Bank and others;

d) organizing subregional workshops involving Contracting Parties and non-Contracting Parties;

e) providing assistance for the identification of Wetlands of International Importance that could be listed as Ramsar sites upon accession;

f) encouraging attendance by observers from non-Contracting Parties at regional meetings and meetings of the Conference of the Parties, and

g) publishing and disseminating an accession kit to assist countries in the Oceania region (and Small Island Developing States more generally) through the accession process. (Resolution VIII.42)
1. Actions have been taken to encourage the adhesion to the Convention of new Contracting Parties

2. Implementation progress since COP8 [Please include additional comments on the implementation of this action.]

**FEEDBACK ON COP9 NATIONAL REPORT FORMAT**

Please include additional comments on the COP9 National Planning Tool, National Report Format. (For instance, adequacy of the questions, the difficulties in completing them, and any further recommendations on how these reporting guidelines could be improved)

In many cases, due to the overlapping of questions or the very detailed components of each question, answers were difficult to formulate. In some cases, these detailed questions preclude an assessment of the progress of Contracting Parties in implementing the main objectives of the Ramsar Convention. The possibility of summarizing the country’s progress at the beginning of the questionnaire is an important element.

In case a specific working group would be created, will you be interested in participating in the preparation of the COP10 National Report Format?
